Revision of Form MMS-2005, Oil and Gas Lease of Submerged Lands Under the Outer Continental Shelf Lands Act

ACTION: Notice of public workshop and extension of comment period.

SUMMARY: This notice announces a public workshop that the MMS will conduct to acquire information pertinent to revision of Form-2005, Oil and Gas Lease of Submerged Lands Under the Outer Continental Shelf Lands Act. The purpose of the workshop is to discuss the plain language revisions to the form. This workshop is being held in conjunction with the MMS sponsored Information Transfer Meeting. We are also giving notice that we are extending the comment period on the Notice of Revision of Form-2005, which was published in the **Federal Register** on November 9, 1998 (63 FR 60380). The comment period is extended to January 8, 1999.

DATES: MMS will conduct the workshop from 1 to 3:30 p.m. on Thursday, December 10.

ADDRESSES: MMS will hold the workshop at the Airport Hilton in Kenner, Louisiana.

FOR FURTHER INFORMATION CONTACT:

Terry Holman, 202-208-3822 or e-mail to Terry.Holman@mms.gov. Comments may be sent to Terry Holman, Minerals Management Service, Mail Stop 4230, 1849 C Street, NW., Washington, DC 20240.

SUPPLEMENTARY INFORMATION: MMS has determined that Form MMS-2005, the lease document, needs revision due to changes in regulations since it was last reviewed in 1986. MMS has revised the form to reflect plain English and has rewritten it for clarity and organization. To reduce the need for future revisions to the document due to changes in regulations, MMS refers the Lessee to applicable laws, and rules and regulations of the Department. Much of the wording of existing Form MMS 2005 that specifically cites, incorporates by reference, or restates statutory and regulatory requirements is therefore deleted from the proposed revision.

[DES 98-54]

Groundwater Replenishment System, Orange County, California

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of the draft program environmental impact report/tier 1 environmental impact statement.

SUMMARY: Pursuant to the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA) of 1969 (as amended), the Orange County Water District and the Orange County Sanitation District and the Bureau of Reclamation (Reclamation) as lead agencies have prepared a joint draft program environmental impact report/tier 1 environmental impact statement (Program EIR/Tier 1 EIS) for a Groundwater Replenishment System in Orange County, California.

DATES: A 60-day public review period begins with the publication of this notice. Public hearings are anticipated to be held during January 1999 in Orange County, California.

ADDRESSES: Written comments on the Program EIR/Tier 1 EIS should be addressed to either Ms. Tama Snow, Senior Engineer, Orange County Water District, P.O. Box 8300, Fountain Valley, California 92728-8300, telephone: 714-378-3213; or Mr. Del Kidd, Environmental Protection Specialist, Bureau of Reclamation, Lower Colorado Region, P.O. Box 61470, Boulder City, Nevada 89006-1470, telephone: 714-293-8698. If requesting copies of the document, contact Tama Snow, telephone: 714-378-3213.

SUPPLEMENTARY INFORMATION: The Orange County Water District (OCWD) and the County Sanitation District of Orange County (CSDOC) propose to develop and advance water treatment plant, pipeline and related facilities within the Cities of Fountain Valley, Santa Ana, Orange, Garden Grove, and Anaheim. The Groundwater Replenishment System (Project) would further process water from the County Sanitation Districts of Orange County. The water from CSDOC, which is typically discharged into the ocean, would be treated through a sophisticated, advanced water treatment

process that would include microfiltration, reverse osmosis and disinfection. The microfiltration process uses a series of microscopically fine filters to remove fine particles, nitrogen, salts, and organic matter that might be in the water. The water from this advanced treatment process would be of better quality than the current water that is in-filtered into the groundwater basin from the Santa Ana River and would surpass (be cleaner and better than) the drinking water standards set by the U.S. Environmental Protection Agency, the California Department of Health Services and other health and regulatory agencies.

The water from this process would be piped to injection wells to create a barrier against saltwater intrusion and to a spreading basin for infiltration into the groundwater basin. The Project would provide a new, reliable water supply to meet increased demands for potable water within the OCWD service area and continue to protect the existing groundwater from further contamination from seawater intrusion. The Project water would also be used to supplement the existing Green Acres Project, which uses recycled water for landscape irrigation and industrial applications. The Project would help reduce the dependency on the uncertain water supplies currently received from northern California and the Colorado River.

Extensive evaluations have been conducted over the past seven years to define and determine the water supply alternatives to meet the future needs of Orange County Water District's customers. The Project was identified to be one of the most reliable and cost effective project alternatives for providing a new local water supply to Orange County. The Project would be implemented in three phases. Phase I would be implemented by the year 2003 and would supply 50,000 acre-feet per year (afy) (one afy is sufficient water to supply two families of four for an entire year). Phases II and III would supply an additional 25,000 afy by the years 2010 and 2020 respectively, or sooner if required.
