BILLING CODE 1410-31-P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Privacy Act of 1974; Transfer of Records

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of transfer of records subject to the Privacy Act to the National Archives.

SUMMARY: Records retrievable by personal identifiers which are transferred to the National Archives of the United States are exempt from most provisions of the Privacy Act of 1974 (5 U.S.C. 552a) except for publication of a notice in the **Federal Register**. NARA publishes a notice of the records newly transferred to the National Archives of the United States which were maintained by the originating agency as a system of records subject to the Privacy Act.

FOR FURTHER INFORMATION CONTACT: Dr. Michael Kurtz, Assistant Archivist for Records Services, Washington, DC, on (301) 713-7000.

SUPPLEMENTARY INFORMATION: In accordance with section (l)(1)(3) of the Privacy Act, archival records transferred from executive branch agencies to the National Archives of the United States are not subject to the provisions of the Act relating to access, disclosure, and amendment. The Privacy Act does require that a notice appear in the **Federal Register** when executive branch systems of records retrievable by personal identifiers are transferred to the National Archives of the United States. After transfer of records retrievable by personal identifiers to the National Archives of the United States, NARA does not maintain these records as a separate system of records. NARA will attempt to locate specific records about an individual in any system of records described in a Privacy Act Notice as being part of the National Archives of the United States. Furthermore, records in the National Archives of the United States may not be amended, and NARA will not consider any requests for amendment.

Archival records maintained by NARA are arranged by Record Group depending on the agency of origin. Within each Record Group, the records are arranged by series, thereunder generally by filing unit, and thereunder by document or groups of documents. The arrangement at the series level or below is generally the one used by the originating agency. Usually, a system of records corresponds to a series.

In this notice, each system is identified by the system name used by the executive branch agency that accumulated the records. That system name is followed by information in parentheses about the National Archives Record Group to which records in the system have been allocated. In the section of the notice covering categories of records in the system, the specific segment of the system transferred to the National Archives of the United States is identified by the accession number assigned to the system segment when it was transferred to the National Archives and the series title associated with the system in the National Archives.

The following systems of records, or parts thereof, retrievable by personal identifiers have been transferred to the National Archives since the last notice published at 61 FR 36573, (July 11, 1996):

1. *System name:* General Personnel Records, OPM/GOVT-1 (part of National Archives Record Group 478, Records of the Office of Personnel Management).

System location: 8601 Adelphi Road, College Park, MD 20740-6001.

Categories of individuals covered by the system: Records in the National Archives cover current and former Federal employees as defined in 5 U.S.C. 2105.

Appendix—General Statement About Uses and Restrictions

A record from an accessioned system of records may be made available to any person who has applied for and received a researcher identification card. No special qualifications are required in order to use the records of the National Archives. Rule governing the use of records and procedures for applying for research cards are found in 36 CFR part 1254. However, the use of some of the records is subject to restrictions imposed by statute or Executive order, or by the restrictions specified in writing in accordance with 44 U.S.C. 2108 by the transferring agency. Restrictions currently in effect on access to particular records that have been specified by the transferring agency are known as "specific restrictions." Restrictions on access that may apply to more than one record group are termed "general restrictions." They are applicable to the kinds of information or classes of accessioned records designated regardless of the record group to which they have been allocated or the specific system of records in which they are contained. The restrictions are published in the "Guide to the National Archives of the United States" and supplemented by restriction statements approved by the Archivist of the United States and set forth in 36 CFR part 1256.

Dated: December 3, 1998.

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U. S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information Pertaining to the Requirement To Be Submitted:

1. *The title of the information collection:* 10 CFR Part 52, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants".

2. *Current OMB approval number:* 3150-0151.

3. *How often the collection is required:* On occasion and every 10 to 20 years for applications for renewal.

4. *Who is required or asked to report:* Designers of commercial nuclear power plants, electric power utilities, and any person eligible under the Atomic Energy Act to apply for a construction permit for a nuclear power plant.

5. *The number of annual respondents:* No applications expected during the next three years.

6. *The number of hours needed annually to complete the requirement or request:* 0.

7. *Abstract:* 10 CFR Part 52 establishes requirements for the granting of early site permits, certifications of standard nuclear power plant designs, and licenses which combine in a single license a construction permit and an operating license with conditions (combined licenses). Part 52 also

establishes requirements for renewal of these permits, certifications, and licenses; amendments to them; exemptions from certifications; and variances from early site permits.

NRC uses the information collected to assess the adequacy and suitability of an applicant's site, plant design, construction, training and experience, and plans and procedures for the protection of public health and safety. The NRC review of such information and the findings derived from that information form the basis of NRC decisions and actions concerning the issuance, modification, or revocation of site permits, design certifications, and combined licenses for nuclear power plants.

Submit, by February 8, 1999, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
