

The total FY 1999 application fee revenue is estimated by multiplying the adjusted application fee rate (\$272,282) by the equivalent number of applications projected to qualify for fees in FY 1999 (150), for a total estimated application fee revenue in 1999 of \$40,842,300. This is the amount of revenue that FDA is also expected to derive both from establishment fees and from product fees.

**IV. Fee Calculations for Establishment and Product Fees**

**A. Establishment Fees**

At the beginning of FY 1998 the establishment fee was based on an estimate of 275 establishments subject to fees. By the end of FY 1998, 343 establishments qualified for and were

billed for establishment fees, before all decisions on requests for waivers or reductions were made. We estimate that a total of 25 establishment fee waivers will be granted in 1998, for a net of 318 fee-paying establishments. In FY 1999 fees will be based on an estimate of 318 establishments paying fees after taking waivers into account. The fee per establishment is determined by dividing the adjusted total fee revenue to be derived from establishments (\$40,842,300), by the estimated 318 establishments, for an establishment fee rate for FY 1999 of \$128,435 (rounded to the nearest dollar).

**B. Product Fees**

At the beginning of FY 1998 the product fee was based on an estimate that 2,100 products would be subject to

product fees. By the end of FY 1998, 2,279 products qualified and were billed for product fees before all decisions on requests for waivers or reductions were made. Assuming that there will be about 55 waivers granted, FDA estimates that 2,224 products will qualify for product fees in FY 1999, after allowing for waivers and exemptions. Accordingly, the FY 1999 product fee rate is determined by dividing the adjusted total fee revenue to be derived from product fees (\$40,842,300) by the estimated 2,224 products for a product fee rate of \$18,364 (rounded to the nearest dollar).

**V. Adjusted Fee Schedules for FY 1999**

The fee rates for FY 1999 are set out in Table 3 of this document.

TABLE 3.

Fee Category	Fee Rates For FY 1999
Applications	
Requiring clinical data .....	\$272,282
Not requiring clinical data .....	\$136,141
Supplements requiring clinical data .....	\$136,141
Establishments .....	\$128,435
Products .....	\$18,364

**VI. Implementation of Adjusted Fee Schedule**

**A. Application Fees**

Any application or supplement subject to fees under the PDUFA that is submitted after December 31, 1998, must be accompanied by the appropriate application fee established in the new fee schedule. Payment must be made in United States currency by check, bank draft, or U.S. postal money order payable to the order of the U.S. Food and Drug Administration. Please include the user fee ID number on your check.

Your check can be mailed to: Food and Drug Administration, P.O. Box 360909, Pittsburgh, PA 15251-6909.

If checks are to be sent by a courier that requests a street address, they can be sent to: Mellon Bank, Three Mellon Bank Center, 27th Floor (FDA 360909), Pittsburgh, PA 15259-0001. (Note: This Mellon Bank Address is for courier delivery only.) Please make sure that the FDA P.O. Box number (P.O. Box 360909) is on the enclosed check.

FDA will bill applicants who submitted application fees between October 1, 1998, and December 31, 1998, based on the adjusted rate schedule.

**B. Establishment and Product Fees**

By December 31, 1998, FDA will issue invoices for establishments and product fees for FY 1999 under the new fee schedules. Payment will be due by January 31, 1999. FDA will issue invoices in October 1999 for any products and establishments subject to fees for FY 1999 that qualify for fees after the December 1998 billing.

Dated: December 15, 1998.

Associate Commissioner for Policy  
Coordination.

#### Gene Therapy Policy Conference; Notice of Conference

Notice is hereby given of a meeting of a Gene Therapy Policy Conference entitled: Prenatal Gene Transfer:

Scientific, Medical, and Ethical Issues on January 7-8, 1999. The conference will be held at the Hyatt Regency Bethesda Hotel, One Bethesda Metro Center, Bethesda, Maryland 20814, starting on January 7 at approximately 8:00 a.m., and will recess at approximately 5:30 p.m. The conference will reconvene on January 8 at approximately 8:00 a.m. and will adjourn at approximately 6:00 p.m. The conference will be open to the public and free of charge; however, registration is required. Registration is available online at <http://www.nih.gov/od/orda> or you can contact Ms. Anne Dunne, Strategic Results, 6004 Lakeview Road, Baltimore, Maryland 21210, Phone 410-377-0110, Fax 410-377-6429. Ms. Dunne will provide conference information upon request. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Dunne in advance of the conference.

On July 8, 1996, the NIH Director published a Notice of Intent to Propose Amendments to the NIH Guidelines for Research Involving Recombinant DNA Molecules Regarding Enhanced Oversight of Recombinant DNA Activities (61 FR 3577). One significant component of the NIH Director's proposal was to establish Gene Therapy Policy Conferences (GTPC). These conferences are intended to offer the unique advantage of assembling numerous participants who possess significant scientific, ethical, and legal expertise and/or interest that is directly applicable to specific recombinant DNA issues. In order to enhance the depth and value of scientific and ethical/social discussion, each GTPC will be devoted to a single issue relevant to scientific merit and/or safety as it relates to research on the use of novel gene delivery vehicles and applications to human gene therapy, novel applications of gene transfer, or relevant ethical/social implications of a particular application of gene transfer technology.

The findings and recommendations of each GTPC will be made available to multiple Department of Health and Human Services (DHHS) components, including the Food and Drug Administration (FDA) and the Office for Protection from Research Risks (OPRR). The NIH Director anticipates that this expanded public policy forum will serve as a model of interagency communication and collaboration, concentrated expert discussion of novel scientific issues and their potential societal implications, and enhanced opportunity for public discussion of specific issues and the potential impact

of such applications on human health and the environment.

On January 7-8, 1999, the NIH will hold its third GTPC entitled: Prenatal Gene Transfer: Scientific, Medical, and Ethical Issues. Topics will include preclinical studies of prenatal gene transfer; prenatal genetic screening and diagnostic tools; optimal clinical trial design focusing on patient safety and measurements of outcome; ethical, legal, and social issues raised by prenatal gene transfer; diagnostic testing and clinical care of patients post gene transfer; and patient education, informed consent, and eligibility.

The findings and recommendations of this conference will be submitted in the form of a report to the NIH Director.

Dated: December 15, 1998.
