

accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Maud Preston Palenske Memorial Library, 500 Market Street, St. Joseph, MI 49085. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the

hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to Jeremy J. Euto, Esquire, 500 Circle Drive, Buchanan, MI 49107, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the

presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(I)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated December 3, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Maud Preston Palenske Memorial Library, 500 Market Street, St. Joseph, MI 49085.

Dated at Rockville, Maryland, this 18th day of December 1998.

## NUCLEAR REGULATORY COMMISSION

### Inspection and Enforcement for U.S. Nuclear Regulatory Commission's Medical Use Licensees—Public Meeting

**AGENCY:** U.S. Nuclear Regulatory Commission.

**ACTION:** Notice of public meeting.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is developing new initiatives to streamline both inspection and enforcement, for certain medical use licensees. NRC will hold a public meeting on January 8, 1999, to obtain early public input in the development of this guidance.

**DATES:** The meeting will be held on January 8, 1999, from 9:00 a.m. to 5 p.m.

**ADDRESSES:** Two White Flint North, Room 2-B-3, 11545 Rockville Pike, Rockville, MD 20852-2738.

**FOR FURTHER INFORMATION CONTACT:** Ronald E. Zelac, U.S. Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards, telephone, 301-415-6316, e-mail [rez@nrc.gov](mailto:rez@nrc.gov).

NRC plans to streamline both inspection and enforcement, for all materials licensees. NRC will begin this new approach with a 1-year pilot program for certain medical use licenses, specifically for nuclear medicine programs (use under 10 CFR 35.100, 35.200, and 35.300), beginning in calendar year 1999. These licenses represent approximately 30 percent of current NRC material licenses.

NRC is developing inspection and enforcement guidance for certain medical use licensees (10 CFR 35.100, 200, 300). The guidance will focus attention on elements of the licensee's program performance having potential for significant health and safety outcomes. The central element of this new approach will be the use of performance indicators for program review. These indicators will consist of a limited number of key factors, each related to an important health and safety outcome. Collectively, they will be used to provide an overall assessment of the adequacy and acceptability of the licensee's radiation protection and materials control program performance. Lessons learned in this area will be applied to inspection and enforcement guidance for other areas.

This initiative is expected to improve the inspection and enforcement process for both the licensees and NRC, by reducing the impact of inspections and the regulatory burden on licensees, and more effectively using NRC resources. The objective of this meeting is to make the public aware of these initiatives and to provide it with an opportunity for public input and comment.

Copies of the inspection guidance that is proposed for the pilot program can be obtained from Ronald Zelac at the above address after December 23, 1998. An electronic copy of the document will be posted to NRC's Homepage (<http://www.nrc.gov>).

The meeting will be open to the public, on a space available basis. Members of the public who are unable to attend the meeting can send comments to Ronald E. Zelac, Rulemaking and Guidance Branch, Division of Industrial and Medical Nuclear Safety, Office of Nuclear Material Safety and Safeguards, by January 15, 1999. Comments received after this date will be considered if it is practical to do so.

Dated at Rockville, Maryland, this 21st day of December 1998.
