

to reflect the change in the legal name of the licensee from CBS Corporation acting through its Westinghouse Electric Company Division to simply the CBS Corporation once the change is accomplished.

The proposed action is in accordance with the licensee's application for amendment dated September 28, 1998, as supplemented on November 17, 1998.

#### *Need for the Proposed Action*

The proposed action is needed to accurately reflect the legal name of the licensee once the name is changed.

#### *Environmental Impacts of the Proposed Action*

The Commission has completed its evaluation of the proposed action and concludes that the action is administrative in nature and will not modify the WTR facility configuration, procedures or requirements, or affect licensed activities. The employees responsible for the licensed WTR facility will still be responsible, either directly through the CBS Corporation or through contractual arrangements for which CBS Corporation is ultimately responsible, notwithstanding the new name of the licensee. The proposed action will not affect the financial qualifications of the licensee to possess and decommission the facility.

The proposed action will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in occupational or public exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not involve any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the Commission concludes that there are no significant environmental impacts associated with the proposed action.

#### *Alternatives to the Proposed Action*

Since the Commission has concluded there is no significant environmental impacts associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no

change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

#### *Alternative Use of Resources*

The action does not involve the use of any resources not previously considered in the environmental report for the decommissioning of the WTR.

#### *Agencies and Persons Contacted*

In accordance with its stated policy, on November 20, 1998, the NRC staff consulted with the Pennsylvania State Official, James G. Yusko, of the Bureau of Radiation Protection, Pennsylvania Department of Environmental Protection, regarding the environmental impact of the proposed action. The State official had no comments.

#### **Findings of No Significant Impact**

On the basis of the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's application dated September 28, 1998, as supplemented by submittal dated November 17, 1998, which are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC.

Dated at Rockville, Maryland, this 21st day of December 1998.

## **NUCLEAR REGULATORY COMMISSION**

[Docket No. 50-390]

### **Tennessee Valley Authority; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-90 issued to the Tennessee Valley Authority (TVA or the licensee) for

operation of the Watts Bar Nuclear Plant, Unit 1 (WBN), located in Rhea County, Tennessee.

The proposed amendment would change the Technical Requirement Manual (TRM) for WBN to prevent a potential shutdown of the unit. The change is in response to sporadic grounds which have been encountered on an annunciator circuit that is used to confirm operability of the ice condenser containment lower inlet door position monitoring system. The proposed license amendment would temporarily revise the TRM Bases for Technical Surveillance Requirement (TSR) 3.6.2.1 (Channel Check—Ice Condenser Lower Inlet Door Position Monitoring System) to provide a temporary, optional method of satisfying the requirements for the channel check. This method would be allowed until the next WBN plant entry into plant operating Mode 3, currently planned in late February 1999, for the next refueling outage.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

A. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The lower inlet doors have been verified to be closed by confirming the lights on the door position monitoring system panel in the control room. The annunciator circuit which is currently impacted by an identified cable ground is not in the required portion of the system. This annunciator provides no safety function. Further, the Inlet Door Position Monitoring System is not required for proper operation of the inlet doors. Therefore, by verifying the green lights are indicating and the red lights are not indicating on a 12-hour frequency provides reasonable assurance the door monitoring system is performing its required function and that the ice condenser system remains operable with no negative

effects from an opened door(s). Accordingly, the change does not increase the probability or consequences of an accident previously evaluated.

B. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The ice condenser lower inlet doors and ice bed are passive features and do not have the potential of creating an accident. This change retains a reasonable method of ensuring door position is known. Accordingly, there are no mechanisms that could create an accident of a different type.

C. The proposed amendment does not involve a significant reduction in a margin of safety.

This TRM bases change provides a reasonable alternative method of ensuring the door position monitoring system is operable. The door position monitoring system itself is not assumed to actuate in any way during the course of postulated plant events. Any problems with door positions would be noted well before it could have any impact on ice bed performance. Accordingly, no Technical Specification is impacted and there is no significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of

Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D59, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By February 1, 1999, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, TN 37042. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should

also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to General Counsel, Tennessee Valley Authority, ET 10H, 400 East Summit Hill Drive, Knoxville, Tennessee 37902, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated December 22 and revision dated December 23, 1998, which is available for public inspection

at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, TN 37042.

Dated at Rockville, Maryland, this 28th day of December 1998.

For the Nuclear Regulatory Commission.

## RAILROAD RETIREMENT BOARD

### Proposed Data Collection Available for Public Comment and Recommendations

**SUMMARY:** In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board will publish periodic summaries of proposed data collections.

*Comments are invited on:* (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection

of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

#### *Title and Purpose of information*

*collection:* Representative Payee Parental Custody Monitoring.

Under Section 12(a) of the Railroad Retirement Act (RRA), the Railroad Retirement Board (RRB) is authorized to select, make payments to, and to conduct transactions with, a beneficiary's relative or some other person willing to act on behalf of the beneficiary as a representative payee. The RRB is responsible for determining if direct payment to the beneficiary or payment to a representative payee would best serve the beneficiary's interest. Inherent in the RRB's authorization to select a representative payee is the responsibility to monitor the payee to assure that the beneficiary's interests are protected. Triennially, the RRB utilizes Form G-99d, Parental Custody Report, to obtain information needed to verify that a parent-for-child representative payee still has custody of the child. One response is required from each respondent. No changes are proposed to Form G-99d.

#### **Estimate of Annual Respondent Burden**

The estimated annual respondent burden is as follows:

Form #(s)	Annual responses	Time (Min)	Burden (Hrs)
G-99d .....	1,850	5	154

#### **ADDITIONAL INFORMATION OR COMMENTS:**

To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, please call the RRB Clearance Officer at (312) 751-3363. Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 N. Rush Street, Chicago, Illinois 60611-2092. Written comments should be received within 60 days of this notice.

**Chuck Mierzwa,**

*Clearance Officer.*

BILLING CODE 7905-01-D

#### **OFFICE OF SPECIAL COUNSEL**

##### **Agency Information Collection Activities Under OMB Review**

**AGENCY:** U.S. Office of Special Counsel (OSC).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. §§ 3501, *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been sent to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of information collected and its expected cost and burden; it also includes the actual data collection instruments.

**DATES:** Comments must be submitted on or before February 1, 1999.

**FOR FURTHER INFORMATION CONTACT:** Erin M. McDonnell, Associate Special Counsel for Planning and Advice, U.S. Office of Special Counsel, at (202) 653-8971 (or by e-mail at [emcdonnell@osc.gov](mailto:emcdonnell@osc.gov)), and refer to OSC Forms 48a-c. Copies of the proposed survey forms will be provided upon request.

#### **SUPPLEMENTARY INFORMATION:**

*Title:* OCS Survey Program Forms. Following the expiration of a prior OMB approval, this is a request for approval of modified forms for use in carrying out an information collection required by law.

*Abstract:* Section 13 of Public Law 103-424 requires the OSC to conduct annual surveys of individuals seeking OSC assistance, and to report on survey results in its annual reports to Congress. The statute provides that the surveys
