

environmental impacts, and engineering aspects of the proposed power project, including all related facilities, such as electric transmission and natural gas lines. The permitting process is open to the public and includes input from the public and all interested parties as well as consultations with other Federal, State, local, and tribal agencies. The review process was initiated when Calpine filed an Application for Certification (AFC) with the CEC on December 15, 1997. On January 21, 1998, the CEC accepted the AFC as complete which begins a 1-year review process. General information on the CEC facility siting process and the SPP can be found on the CEC's Internet web site (<http://www.energy.ca.gov/sitingcases/sutterpower>). Since the project site is currently zoned for agricultural uses, Calpine will request Sutter County to permit a rezone of the 77-acre parcel to a planned development site, thus allowing industrial use. Western, CEC, and Sutter County reviews will occur concurrently.

The EIS will be prepared in accordance with the requirements of CEQ's NEPA implementing regulations (40 CFR 1500-1508) and DOE's NEPA Implementing Procedures (10 CFR 1021). Full public participation and disclosure are planned for the entire EIS process. It is anticipated that the EIS process will take 12 months and will include public information/scoping meetings; coordination and involvement with appropriate Federal, State, local, and tribal government agencies; public review and hearings on the published draft EIS; a published final EIS; a review period; and publication of a record of decision (ROD). Public information and scoping meetings will begin March 3, 1998. Publication of the ROD is anticipated in the fall of 1998.

Dated: February 5, 1998.
