SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for downlisting or delisting listed species, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in

1988 requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during the public comment period prior to approval of each new or revised recovery plan. Substantive technical comments will result in changes to the plan. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions. Individualized responses to comments will not be provided.

The six species of plants covered in the draft recovery plan are primarily restricted to gabbro soils habitat in the central Sierra Nevada foothills of California. Conversion of habitat to urban uses has extirpated the listed species and species of concern from a significant portion of their historic ranges. The remaining natural communities are highly fragmented, and many are marginal habitats in which these species may not persist during catastrophic events.

The objectives of this recovery plan are two-fold: (1) to delist the plants Stebbin's morning-glory, Pine Hill ceanothus, Pine Hill flannelbush, El Dorado bedstraw, and Layne's butterweed by protecting, enhancing, restoring, and appropriately managing their habitat; and (2) to ensure the long-term conservation of the one species of concern, El Dorado mule-ears, that occurs in the same gabbro soils habitats with the listed species.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of this plan.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

AGENCY: Bureau of Land Management, Vale District Office, Baker Resource Area, DOI.

ACTION: Notice of Closure and Restriction on Public Lands for the protection of resource values identified in South Fork of the Walla Walla River Area Plan Amendment, February 1992, for public safety, and subsequent listing of the Bull Trout as a federally threatened and endangered fish and proposed listing of the Mid-Columbia River Summer Steelhead.

SUMMARY: Pursuant to the regulations contained in the Title 43 CFR 8364, the Bureau of Land Management is limiting motorized vehicle travel within the ACEC. Motorcycles will continue to be allowed on the South Fork of the Walla Walla trail. Motorized vehicles will also continue to be allowed at the trailhead parking area and access road. All other motorized vehicle use is prohibited within the ACEC. The ACEC is closed to overnight camping. Discharging firearms within the road corridor between the cattleguard west of the trailhead parking area and the trail head gate is prohibited.

These closure and restriction orders will be in effect on approximately 1,955 acres of public land within the South Fork of the Walla Walla River corridor. A map of the area described above may be viewed in the Baker Resource Area Office.

The limitations are necessary to prevent deterioration of the area's resource values including soil and water resources and habitat for Threatened and Endangered fish. The limitations will also provide for public safety and will be consistent with U.S. Forest Service regulations for the trail right-of-way connecting to Umatilla National Forest lands to the east of the ACEC.

Personnel that are exempt from the area limitations include any Federal, State, or local officer, or member of any organized rescue or fire-fighting force in the performance of an official duty, or

any person authorized in writing, in advance by the Bureau of Land Management, Baker Resource Area Manager.

This replaces and rescinds all previous closures including the Emergency Closure and Restriction on Public Lands in the South Fork of the Walla Walla River Area of Critical Environmental Concern (ACEC) dated September 28, 1994.

DATES: The closures and restrictions are in effect immediately and shall remain in effect until rescinded by the authorized officer.
