United States Geological Survey

Prospective Grant of Exclusive Patent License

This is notice in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the U.S. Geological Survey (USGS), U.S. Department of the Interior, is contemplating the grant of an exclusive license in the United States to practice the invention embodied in U.S. Patent Application Serial Number 9-015,214 entitled "Automated Groundwater Monitoring System and Method," to Systems Management, Inc. of Hunt Valley, MD 21031.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the grant of this published notice, USGS receives written evidence and argument which establishes that the grant of a license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The present invention is a method of monitoring the quality of water at a ground water sampling site without human intervention. Waste at the sampling site is purged until at least one preselected purge criterion is satisfied. At least one water quality attribute is automatically measured at the sampling site, and quality of water at the site is determined based on the measured water quality attribute. The method is performed by a system including a control unit which, in accordance with a computer program, controls the taking of water quality attribute measurements at the sampling site. The control unit may be equipped with a port for downloading data to a technician on site and with a transceiver for communicating data to a base station via a communications network.

The availability of the invention for licensing has been announced on the USGS' website (www.usgs.gov/tech-transfer), on a inventor's website (<http://ma.water.usgs.gov/automo/>), and at industry exhibits appearing more than a year ago.

A copy of the cited patent application is available, for those with a licensing interest, from the USGS Technology Enterprise Office. It may be requested by phone at (703) 648-4450 or by e-mail at rgraves@usgs.gov.

Inquiries, comments and other materials relating to the contemplated license must be submitted by regular mail to Neil L. Mark, Technology Enterprise Office, U.S. Geological Survey, 211 National Center, Reston, VA 20192 or by email at nmark@usgs.gov.

Properly filed competing applications received by the USGS in response to this notice will be treated as objections to the grant of the contemplated license.

Anton L. Inderbitzen,

Director, Technology Enterprise Office.

New Mexico: Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Public Law 97-451, a petition for reinstatement of oil and gas lease NMNM 96062 for lands in Lea County, New Mexico, was timely filed and was accompanied by all required rentals and royalties accruing from December 1, 1998, the date of termination.

No valid lease has been issued affecting the lands. The lessee has

agreed to new lease terms for rentals and royalties at rates of \$10.00 per acre or fraction thereof and 16-2/3 percent, respectively. The lessee has paid the required \$500 administrative fee and has reimbursed the Bureau of Land Management for the cost of this **Federal Register** notice.

The Lessee has met all the requirements for reinstatement of the lease as set out in Sections 31(d) and (e) of the Mineral Leasing Act of 1920 (30 USC 188), and the Bureau of Land Management is proposing to reinstate the lease effective December 1, 1998, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.
