

The Rule

This amendment to 14 CFR part 71 modifies Class E airspace at Flint, MI, to accommodate aircraft executing the proposed GPS SIAP 047° helicopter point in space approach for Genesys Regional Medical Center Heliport by modifying existing controlled airspace. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

New Animal Drugs For Use In Animal Feeds; Narasin and Nicarbazine With Roxarsone

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Elanco Animal Health, a Division of Eli Lilly and Co. The NADA provides for combining approved narasin/nicarbazin (1:1 fixed ratio) and roxarsone type A medicated articles to make combination drug type C medicated broiler chicken feeds for prevention of coccidiosis, for increased rate of weight gain, improved feed efficiency, and improved pigmentation.

EFFECTIVE DATE: April 26, 1999.

Jeffrey M. Gilbert, Center for Veterinary

Medicine (HFV–128), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–1600.

SUPPLEMENTARY INFORMATION: Elanco Animal Health, a Division of Eli Lilly and Co., Lilly Corporate Center, Indianapolis, IN 46285, filed NADA 141–113 that provides for combining approved narasin/nicarbazin (1:1 fixed ratio, 27 grams per pound (g/lb) each) (Maxiban®) and roxarsone (45.4, 90, and 227 g/lb) (3–Nitro®) type A medicated articles to make combination drug type C medicated broiler chicken feeds. The type C feeds contain 27 to 45 g/ton each of narasin and nicarbazine and 22.7 to 45.4 g/ton roxarsone. The type C broiler feeds are used for prevention of coccidiosis caused by *Eimeria tenella*, *E. necatrix*, *E. acervulina*, *E. maxima*, *E. brunetti*, and *E. mivati*, and for increased rate of weight gain, improved feed efficiency, and improved pigmentation. The NADA is approved as of March 4, 1999, and the regulations are amended in 21 CFR 558.363, 558.366, and 558.530 to reflect the approval.

In accordance with the freedom of information provisions of 21 CFR part 20 and 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

This approval is for use of approved type A medicated articles to make combination drug type C medicated feeds. These ingredients are Category II drugs as defined in 21 CFR 558.3(b)(1)(ii). As provided in 21 CFR 558.4(b), an approved form FDA 1900 is required for making type B or C medicated feeds as in this application. Under section 512(m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(m)), as amended by the Animal Drug Availability Act of 1996 (Pub. L. 104–250), medicated feed applications have been replaced by a requirement for manufacture in a licensed feed mill. Therefore, use of narasin/nicarbazin and roxarsone type A medicated articles to make type C medicated feeds as in NADA 141–113 is limited to manufacture in a licensed feed mill.

FDA has determined under 21 CFR 25.33(a)(2) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment

nor an environmental impact statement is required.
