

determined to be beneficial in the original Plan.

A draft Supplement was released on December 18, 1998 (63 FR 70155), and the 52-day comment period closed on February 8, 1999. The final Supplement contains summaries and responses to the comments received.

The final Supplement analyzes Plum Creek's proposal in order to determine the environmental impact (beneficial or adverse) that would result from implementation of the Plan modification, as compared to the original Federal Action (approval and implementation of the original Plan and issuance of a Permit). It does not address the Federal action of land exchange.

The final Supplement considers three alternatives, including the Proposed Action and the No-action Alternatives. Under the No-action Alternative, Plum Creek would continue to implement the existing Plan on the current land base. This alternative includes specific mitigation for wildlife whether or not those species are listed under the Endangered Species Act (ESA). The Proposed Action would allow the modification of the Plan to accommodate the new land base and would, therefore, apply the Plan standards to the newly acquired Plum Creek lands. The Northwest Forest Plan would apply to newly acquired National Forest lands. The Partial-Modification Alternative would allow the transfer of lands from Plum Creek to the Forest Service, but would not add the newly acquired Plum Creek lands to the Plan. Instead, take prohibitions under section 9 of the ESA would apply with respect to listed species, but no conservation would be required for other wildlife and special habitats.
