

aircraft arrival and departure corridors required for operation of the Denver International Airport.

The ANG evaluated the environmental impacts of the CAI in its document, Final Environmental Impact Statement for the Colorado Airspace Initiative, (FEIS) dated August 1997. The preferred alternative was also the environmentally preferred alternative in the FEIS. The preferred alternative was modified in response to concerns raised by private citizens, government agencies, and various public interest groups. The ANG changed its proposal to narrow the widths of portions of corridors of four military training routes and withdrew one route. Subsequently, the ANG issued a Record of Decision (ROD) on October 28, 1997, approving the preferred alternative as modified. The ANG then submitted the FEIS to the FAA with its application for airspace approval.

In furtherance of CEQ regulations, in addition to the executive summary of the ANG FEIS, the FAA is recirculating the following information: (1) the ANG's ROD; (2) a summary of public comments submitted during the aeronautical review and responses to the comments; and (3) a summary of the refinements the ANG made in the ROD to the preferred alternative after the ANG FEIS was issued.

Any person may obtain a copy of the ANG FEIS, ROD and the above-referenced information by submitting a request to: Air National Guard Readiness Center, Program Manager, CAI EIS, ANGRC/CEVP, 3500 Fetchet Avenue, Andrews Air Force Base, MD 20762-5157.
