

wastes; the design capacity of such processes; and the specific hazardous wastes to be handled at the facility. Part B requires detailed site specific information such as geologic, hydrologic, and engineering data. In the event that permit modifications are proposed by the applicant or EPA, modifications must conform to the requirements under sections 3004 and 3005.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The Agency today begins an effort to examine the part B permit application requirements and consider options for reducing the burden and increasing the usefulness of the information that is collected. The Agency would appreciate any information on the users of this information, how they use this information, how the information could be improved, and how the burden for this information collected can be reduced.

Therefore, the EPA would like to solicit comments to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) enhance the quality, utility, and clarity of the information to be collected; and
- (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

*Burden Statement:* The estimated average burden for renewing the existing part B ICR is as follows:

- Demonstrations and exceptions: 2.4 hours
- Legal review: 100 hours
- Permit information under 270.10(j): 10 hours
- Demonstrations under 270.14(a): .1 hour
- General facility standards: 486 hours
- Financial assurance: 19 hours
- Ground-water protection: 237 hours
- Specific unit requirements under 270.15 through 270.26: 1,737 hours

- Permit modifications: 2.4 hours
- Renewal of permits: 1 hour
- Special forms of permits: 99 hours

The number of respondents per year for part B permit applications, permit modifications and special permits is variable. In the 1996 part B ICR, EPA estimated that 44 part B permit applications, 58 permit modifications and 5 special forms of permits were submitted annually. The 1996 estimated total annual burden on respondents for part B permit applications, permit modifications and special permits was 118,926 hours.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: July 16, 1999.

### Agency Information Collection Activities: Submission for OMB Review; Comment Request, NSPS Glass Manufacturing Plants

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: NSPS Subpart CC, Glass Manufacturing Plants, OMB Control Number 2060-0054, EPA number 1131.06, expiration date July 31, 1999. The ICR describes the nature of the information collection and its expected

burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before August 23, 1999.

#### FOR FURTHER INFORMATION CONTACT:

Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1131.06.

#### SUPPLEMENTARY INFORMATION:

*Title:* NSPS Subpart CC, Glass Manufacturing Plants, OMB Control Number 2060-0054, EPA number 1131.06, expiration date July 31, 1999. This is a request for extension of a currently approved collection.

*Abstract:* The New Source Performance Standards (NSPS) for glass manufacturing plants were proposed on June 15, 1979 and promulgated on October 7, 1980, and amended October 19, 1984. Approximately 30 sources are currently subject to the standard, and it is estimated that no additional sources will become subject to the standard in the next three years. The standards do not apply to hand glass melting furnaces, glass melting furnaces designed to produce less than 4,550 kilograms of glass per day, or all-electric melters. Experimental furnaces are not subject to the emission standards at 40 CFR 60.292. The standards set particulate matter emission limits. There are separate limits for sources using "modified-process" glass melting furnaces. Modified-process is defined as any technique designed to minimize emissions without add-on controls. Emission limits are specific for the type of glass produced, and are listed at section 60.292(a) and section 60.293(b).

Owners or operators of the affected facilities described must make initial reports when a source becomes subject, conduct and report on a performance test, demonstrate and report on continuous monitor performance, maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports of excess emissions are required. These notifications, reports, and records are required, in general, for all sources subject to NSPS. The recordkeeping and reporting requirements specific to glass manufacturing plants are detailed in the CFR. This information is being collected to assure compliance with 40 CFR part 60, subpart CC.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following

the date of such measurements, maintenance reports, and records. All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office.

In the Administrator's judgment, particulate matter emissions from glass manufacturing plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category at 40 CFR part 60, subpart CC.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on January 5, 1999. No comments were received.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 6.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Owners and operators of Glass Manufacturing Plants.

**Estimated Number of Respondents:** 30  
**Frequency of Response:** Initial reports if there are new sources, and, semiannual excess emissions reports

**Estimated Total Annual Hour Burden:** 398 hours.

**Estimated Total Annualized Capital, O&M Cost Burden:** \$174,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection

techniques to the following addresses. Please refer to EPA ICR No. 1131.06 and OMB Control No. 2060-0054 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460;

and  
Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA 725 17th Street, NW, Washington, DC 20503.

Dated: July 19, 1999.

### Agency Information Collection Activities: Submission for OMB Review; Comment Request; Reporting and Recordkeeping Requirements for the New Source Performance Standards for Municipal Solid Waste Landfills

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Reporting and Recordkeeping Requirements for the New Source Performance Standards for Municipal Solid Waste Landfills, OMB Control Number 2060-0220, expiration date August 31, 1999. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before August 23, 1999.

#### FOR FURTHER INFORMATION CONTACT:

Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at [Farmer.Sandy@epamail.epa.gov](mailto:Farmer.Sandy@epamail.epa.gov) or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1557.04.

**SUPPLEMENTARY INFORMATION:** *Title:* Reporting and Recordkeeping Requirements for the New Source

Performance Standards for Municipal Solid Waste Landfills (OMB Control No. 2060-0220; EPA ICR No. 1557.04) expiring 8/31/99. This is a request for extension of a currently approved collection.

**Abstract:** In the Administrator's judgement municipal solid waste (MSW) landfill emissions generated by decomposition of municipal solid waste deposited in an MSW landfill may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category.

All respondents must submit an initial design capacity report which includes the landfill's maximum design capacity, date of anticipated startup, and the anticipated refuse acceptance rate. If the design capacity of a new landfill is less than 2,500,000 megagrams (Mg), no further reporting or recordkeeping is required. Under certain circumstances, amended design capacity reports may be required. If the facility's design capacity is equal to or greater than 2,500,000 Mg, the owner or operator is required to determine the facility's nonmethane organic compound (NMOC) emission rate.

If the NMOC emission rate is determined to be <50 Mg/yr, using Tier 1, Tier 2, or Tier 3 calculations, no further calculation or testing is required for that year. Owners or operators of MSW landfills emitting <50 Mg NMOC per year may submit reports of NMOC emission rates yearly. However, NSPS Subpart WWW, also allow owners or operators to report less frequently. Under these provisions, the NMOC report may be accompanied by an estimation of the annual NMOC emission rate for each of the next 5 years, provided that none of the estimated rates reaches 50 Mg/yr. In this case, the owner or operator would not submit annual reports, but the estimation would be updated and resubmitted every 5 years. The owner or operator would also be required to revise the estimate in any year in which the actual waste acceptance rate for that year exceeds the waste acceptance rate upon which the previously submitted estimate is based.

Owners or operators of landfills with collection and control systems installed in compliance with the standards are not required to submit reports of NMOC emission rates. Owners or operators of affected facilities would be required to keep records of accumulated refuse and waste acceptance rates for a minimum of 5 years.

For landfills required to install collection and control systems (i.e., those emitting greater than 50 Mg/yr of
