#### SUPPLEMENTARY INFORMATION

##### I. Background

The ETA 5159 report contains information on claims activities including initial claims, weeks claimed, weeks compensated, and the amount of benefit payments. These data are used in budgetary and administrative planning, program evaluation, and reports to Congress and the public. The change being proposed concerns continued weeks claims filed by interstate claimants. Revised interstate claims taking procedures provide that interstate continued weeks can no longer be filed through the agent State. All such claims are now mailed or phoned directly to the liable State. Therefore the data item interstate continued weeks claimed taken by the agent State will be zero. This change removes that data item from the report form.

##### II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the

use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

##### III. Current Actions

The ETA 5159 report continues to be needed for administrative financing, program evaluation and public information. The revision eliminates a data item no longer needed.
