

importer of cocaine (9041), a basic class of controlled substance listed in Schedule II.

The firm plans to import cocaine to manufacture topical solutions for distribution to customers.

A registered bulk manufacturer of cocaine filed written comments and an objection in response to the Notice of Application. The objector argues that it would not be in the public interest to register Roxane because it would violate United States policy against the use of seized material and that competition is adequate. Both of these issues have already been considered and addressed in Roxane's Notice of Registration published in the **Federal Register** on October 19, 1998 (63 FR 5589).

DEA has considered the factors in Title 21, United States Code, Section 823(a) and 952(a) and determined that the registration of Roxane Laboratories, Inc. to import cocaine is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971, at this time. DEA has investigated Roxane Laboratories, Inc. on a regular basis to ensure that the company's continued registration is consistent with the public interest. These investigations have included inspection and testing of the company's physical security systems, audits of the company's records, verification of the company's compliance with state and local laws, and a review of the company's background and history. Therefore, pursuant to Section 1008(a)

of the Controlled Substances Import and Export Act and in accordance with Title 21, Code of Federal Regulations, Section 1301.34, the above firm is granted registration as an importer of the basic class of controlled substance listed above.
