[DES 99-46]

**Notice of Availability of Draft Environmental Impact Statement/ Environmental Impact Report for the Trinity River Mainstem Fishery Restoration****ACTION:** Notice of availability for public comment.

**SUMMARY:** This notice announces the availability of a joint draft Environmental Impact Statement/ Environmental Impact Report (DEIS/ EIR) for the Trinity River Mainstem Fishery Restoration. The U.S. Fish and Wildlife Service, U.S. Bureau of Reclamation, Hoopa Valley Tribe, and Trinity County prepared a DEIS/EIR to assist the Secretary of the Interior in developing recommendations for permanent instream fishery flow requirements, habitat restoration projects, and operating criteria and procedures for Trinity River Division of the Central Valley Project, California, necessary for the restoration and maintenance of natural production of anadromous fish in the Trinity River. Such recommendations are required by: the January 14, 1981, Secretarial Decision that initiated the Trinity River Flow Evaluation; the Trinity River Basin Fish and Wildlife Management Act (Pub. L. 98-541); and the Central Valley Project Improvement Act (Pub. L. 102-575).

**DATES:** Written comments on the DEIS/ EIR *must be received on or before* December 8, 1999. Oral or written comments on this DEIS/EIR may be provided at any of the three public hearings. Joint NEPA/CEQA public hearings will be held from 1-3 p.m. and from 6-8 p.m. for each of the following dates and locations:

Tuesday, November 16, 1999 at the Holiday Inn Appaloosa Room, 1900 Hilltop Drive, Redding, California  
 Thursday, November 18, 1999 at the Sacramento Grand Ballroom, 629 J Street, Sacramento, California  
 Tuesday, November 23, 1999 at the Eureka Inn Colonnade Room, 518 7th Street, Eureka, California  
 The Trinity County Board of Supervisors will also hold a CEQA meeting to receive public comment on December 7, 1999, from 7-9 p.m. at Trinity County Library, 211 N. Main St., Weaverville, California.

**ADDRESSES:** Written comments regarding the DEIS/EIR should be

addressed to Mr. Joe Polos, Fish and Wildlife Service, 1125 16th Street, Room 209, Arcata, CA 95521. Written comments may also be sent by facsimile to (707) 822-8411. Please see Additional Addresses in the **SUPPLEMENTARY INFORMATION** section for additional information on the availability of the DEIS/EIR.

**FOR FURTHER INFORMATION CONTACT:** Joe Polos, Fish and Wildlife Service, 1125 16th Street, Room 209, Arcata, CA 95521 (707) 822-7201.

**SUPPLEMENTARY INFORMATION:**

Construction of the Trinity River Division (TRD) of the Central Valley Project (CVP) was completed in 1963. The primary function of the TRD is to store Trinity River water for regulated diversion to the Central Valley of California for agricultural, municipal, and industrial uses. Construction and operation of the TRD resulted in the diversion of up to 90 percent of the average annual discharge in the Trinity River at Lewiston, and blocked access to 109 miles of salmon and steelhead spawning and rearing habitat. Reduced river flows, combined with excessive watershed erosion and encroachment of the river channel by riparian vegetation, caused major changes in the channel morphology resulting in the simplification and degradation of the remaining salmon and steelhead habitat of the Trinity River below the Lewiston. This, in turn, resulted in rapid declines of salmon and steelhead populations following completion of the TRD.

In response to declining fisheries and degraded habitat conditions, the Secretary of the Interior (Secretary) decided in 1981 to increase flows in the Trinity River ranging from 140,000 acre-feet to 340,000 acre-feet annually, with reductions in dry and critically dry years. In addition, the Fish and Wildlife Service was directed to undertake a Flow Evaluation Study to assess fish habitat at various flows, summarize the effectiveness of other instream and watershed restoration activities, and recommend appropriate flows and other measures necessary to better maintain favorable habitat conditions. The Flow Evaluation Study began in October 1984 and was completed in June 1999. In October 1984, the Trinity River Basin Fish and Wildlife Management Act (Management Act) (Pub. L. 98-541) was enacted by Congress with the goal of restoring fish and wildlife populations to pre-TRD levels. The Act provided funding for construction, operation, and maintenance of the 11-item action plan developed by the Trinity River Task Force in 1982.

In 1992, the Central Valley Project Improvement Act (CVPIA) (Public Law 102-575) was passed. Section 3406(b)(23) of the CVPIA provides, through the TRD, an instream release of not less than 340,000 acre-feet of water into the Trinity River to meet Federal trust responsibilities to protect fishery resources of the Hoopa Valley Tribe and to meet the fishery restoration goals of Management Act. The recommendations for mainstem Trinity River fishery restoration will be developed after appropriate consultations with Federal, State, Tribal, local agencies, and affected interests, and after completion of the Flow Evaluation Study.

To restore the natural production of anadromous fish in the Trinity River in accordance with the 1981 Secretarial Decision, the Management Act, and the CVPIA, the DEIS/EIR analyzes the impacts of:

- (1) Increased instream releases into the Trinity River to provide anadromous fish habitat and restore fluvial processes,
- (2) Implementation of a channel rehabilitation program,
- (3) Implementation of a spawning gravel supplementation program,
- (4) Implementation of a watershed rehabilitation program, and
- (5) Implementation of an Adaptive Management Program.

On October 12, 1994, a notice was published in the **Federal Register** (94 FR 25141) announcing the intent to prepare a joint EIS/EIR on the Mainstem Trinity River Fishery Restoration, and inviting comments on the scope of the EIS/EIR. Comments were received and considered and are reflected in the DEIS/EIR made available for comment through this notice.

The DEIS/EIR is intended to accomplish the following:

- (1) Inform the public of the proposed action and alternatives;
- (2) Address public comments received during the scoping period;
- (3) Disclose the direct, indirect, and cumulative environmental effects of the proposed action and each of the alternatives; and
- (4) Indicate any irreversible commitment of resources that would result from implementation of the proposed action.

The Service invites the public to comment on the DEIS/EIR. All comments received will become part of the public record and may be released. The public will have 45 days to review and comment on this DEIS/EIR. Written comments regarding the DEIS/EIR should be addressed to Mr. Joe Polos, Fish and Wildlife Service, 1125 16th Street, Room 209, Arcata, CA 95521.

Written comments may also be sent by facsimile to (707) 822-8411. Oral or written comments on this DEIS/EIR may also be provided at any of the three public hearings. This notice is provided pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, as implemented by the Council on Environmental Quality Regulations (40 CFR parts 1500-1508), and the California Environmental Quality Act of 1970, as amended.

The Technical Appendixes (TA) for this DEIS/EIR will be made available upon request from the U.S. Fish and Wildlife Service, Arcata Office, 1125 16th Street, Room 209, Arcata, CA 95521; (707) 822-7201. Documents cited in the DEIS/EIR will be available for viewing in Sacramento (U.S. Fish and Wildlife Service, 2800 Cottage Way, Suite W2606; 916-414-6464), Arcata (U.S. Fish and Wildlife Service, 1125 16th Street, Room 209; 707-822-7201), and Weaverville (Trinity County Library, 211 N. Main Street, Weaverville, California 96093, 530-623-1373).
