The Deputy Administrator further orders that aggregate production quotas for all other Schedules I and II controlled substances included in §§ 1308.11 and 1308.12 of Title 21 of the Code of Federal Regulations remain at zero.

The Office of Management and Budget has determined that notices of aggregate production quotas are not subject to centralized review under Executive Order 12866. This section has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this matter does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The Deputy Administrator hereby certifies that this action will have no significant impact upon small entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* The establishment of aggregate production quotas for Schedules I and II controlled substances is mandated by law and by international treaty obligations. Aggregate production quotas apply to approximately 200 DEA registered bulk and dosage form manufacturers of Schedules I and II controlled substances. The quotas are necessary to provide for the estimated medical, scientific, research and industrial needs of the United States, for export requirements and the establishment and maintenance of reserve stocks. While aggregate production quotas are of primary importance to large manufacturers, their impact upon small entities is neither negative nor beneficial. Accordingly, the Deputy Administrator has determined

that this action does not require a regulatory flexibility analysis.

Deputy Administrator.

NUCLEAR REGULATORY COMMISSION

[Docket No. STN 50-528]

Arizona Public Service Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-41 issued to Arizona Public Service Company for operation of the Palo Verde Nuclear Generating Station Unit 1 located in Maricopa County, Arizona.

The proposed amendment would revise Technical Specification (TS) Section 3.8.4, "DC Sources—Operating," to waive, on a one-time basis, the requirement to perform Surveillance Requirement (SR) 3.8.4.8 for Unit 1 channels A, B, and C.

Battery replacement in Unit 1 was scheduled to be completed during the current refueling outage (1R08, Fall 1999). Because of problems experienced by the vendor of the low specific gravity rectangular cell batteries, four acceptable batteries are not available and the planned battery replacement will not be completed as planned. Unit 1 will, therefore, need to operate for one more cycle with the high specific gravity round cell batteries.

Because the high specific gravity round cell batteries will remain in Unit 1 for an additional cycle, the licensee is required to perform a performance discharge test or a modified performance discharge test in accordance with TS SR 3.8.4.8. SR 3.8.4.8 requires that a performance discharge test be performed to verify battery capacity on a 60-month frequency. The specified frequency for this SR, including the additional time allowed by SR 3.0.2 (1.25 times the interval specified in the frequency), for
