

**Background**

On November 4, 1998, at 63 FR 59621, a notice was published on implementation information for Innovative Bridge Research and Construction Program funds [Pub. L. 105-178, 112 Stat. 107, 428 (1998), codified at 23 U.S.C. 503(b)]. This notice described the legislative basis for the program and the process for application for program funds for the fiscal years of 1998 and 1999. The notice further advised that the Secretary will select and approve applications based on whether the project that is the subject of the grant meets the goals of the program. The notice also advised that the Federal share of the cost of a project under this program will be determined by the Secretary and may include funds for preliminary engineering and performance evaluation.

The FHWA recognizes the public's interest in how the agency evaluates and selects projects to be funded. For that reason, we are scheduling a public meeting to obtain comments and ideas from interested persons to assist the FHWA in implementing section 5103 expeditiously. Oral statements and comments made by the participants during the course of the meeting will be recorded and incorporated into the official proceedings. Written comments will be accepted and placed in the public docket along with a transcript of the meeting. All docket comments and meeting transcripts will subsequently be available for review in the DOT Docket room.

During the hearing we plan to discuss all relevant issues concerning the evaluation, selection and funding of projects which meet the goals of the innovative bridge research and construction program.
