

expand at a pace somewhat above the middle of its range.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. In furtherance of these objectives, the Committee reaffirmed at its meeting in June the ranges it had established in February for growth of M2 and M3 of 1 to 5 percent and 2 to 6 percent respectively, measured from the fourth quarter of 1998 to the fourth quarter of 1999. The range for growth of total domestic nonfinancial debt was maintained at 3 to 7 percent for the year. For 2000, the Committee agreed on a tentative basis in June to retain the same ranges for growth of the monetary aggregates and debt, measured from the fourth quarter of 1999 to the fourth quarter of 2000. The behavior of the monetary aggregates will continue to be evaluated in the light of progress toward price level stability, movements in their velocities, and developments in the economy and financial markets.

To promote the Committee's long-run objectives of price stability and sustainable economic growth, the Committee in the immediate future seeks conditions in reserve markets consistent with increasing the federal funds rate to an average of around 5-1/2 percent. In view of the evidence currently available, the Committee believes that prospective developments are equally likely to warrant an increase or a decrease in the federal funds rate operating objective during the intermeeting period.

[Program Announcement No. 93612-002]

#### Availability of Financial Assistance To Investigate the Feasibility of Tribal Energy Sales

**AGENCY:** Administration for Native Americans (ANA), ACF, DHHS.

**ACTION:** Announcement of availability of competitive financial assistance to assist planning that examines and develops Tribal regulatory, management and energy conservation capabilities and opportunities available. Planning activities is an approach to addressing the mitigation of Indian lands due to DOD activities to Indian lands.

**SUMMARY:** The Administration for Native Americans (ANA) has cancelled the January 22, 1999 announcement, which announced the availability of financial assistance for the mitigation of environmental impacts on Indian lands due to Department of Defense Activities. (Program Announcement No. 93612-993) The cancellation of the January 22, 1999 announcement was published in the **Federal Register** on September 14, 1999. (Program announcement No. 93612-0002)

The Congress has recognized that DOD activities may have caused environmental problems for Indian tribes and Alaska Natives. These environmental hazards can negatively impact the health and safety as well as the social and economic welfare of Indian tribes and Alaska Natives. Accordingly, the Congress has taken steps to help those affected begin to mitigate environmental impacts from DOD activities by assisting them in the planning, development and implementation of programs for such mitigation. This environmental mitigation program was begun through a program announcement published on December 29, 1993 as a response to the Department of Defense Appropriations Act, Pub. L. 103-139, which was enacted on November 11, 1993.

This program continues under Pub. L. 103-335 (the Act), enacted on September 30, 1994. Section 8094A of the Act states that funds appropriated to the Department of Defense (DOD) for Operations and Maintenance Defense-Wide, not less than \$8,000,000 shall be made available until expended to the Administration for Native Americans. Provided that such funds shall be made available only for the mitigation of environmental impacts, including training and technical assistance to tribes, related administrative support, the gathering of information, documenting of environmental damage, and developing a system for prioritizing of mitigation, on Indian lands resulting from Department of Defense activities. This program announcement primarily focuses on planning projects that investigate the feasibility of tribal energy sales through energy development, as a means of mitigating Indian lands. Mitigation as defined in 40 CFR 1508.20 includes "(e) Compensating for the impact by replacing or providing substitute resources or environments".

#### Application Kit

Application kits, are approved by the OMB under control number 0980-0204, which expired August 31, 1999. The current kit remains valid and contains the necessary forms and instructions to apply for a grant under this program announcement.

Application kits may be obtained from ANA training and technical assistance providers. ANA employs contractors to provide short-term training and technical assistance (T/TA) to eligible applicants. T/TA is available under these contracts for a wide range of needs; however, the contractors are not authorized to write applications. The T/TA is provided at no cost.

To obtain an application kit and/or training and technical assistance, applicants are encouraged to contact the appropriate T/TA provider within the appropriate service area.
