DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

[Docket No. 000410098-0098-01] RIN 0660-ZA12

Market for Satellite Communications and the Role of Intergovernmental Satellite Organizations

AGENCY: National Telecommunications and Information Administration, Commerce.

ACTION: Notice, request for comments.

SUMMARY: The Department of Commerce requests comments regarding the advantages accorded signatories of the International Telecommunications Satellite Organization (INTELSAT), in terms of immunities, market access, or otherwise, in the countries or regions served by INTELSAT, the reason for such advantages, and an assessment of progress toward fulfilling a procompetitive privatization of that organization. The International Anti-Bribery and Fair Competition Act of 1998, Pub. L. No. 105–366, implements the Organization for Economic Cooperation and Development (OECD) Convention on Combating Bribery of Foreign Public Officials in International Business Transactions (the OECD Convention). In that legislation, the U.S. Congress imposed certain reporting requirements for the Department of

Commerce to begin in 1999 and to continue annually for each of the next five years. The Secretary of Commerce issued the first report in July 1999. See Addressing the Challenges of International Bribery and Fair Competition—The First Annual Report Under Section 6 of the International Anti-Bribery and Fair Competition Act of 1998, July 1999. The report may be viewed at http://www.ita.doc.gov/legal/master.html.

The House report on the legislation expresses an expectation for extensive fact-findings on the nature of the market for satellite communications and, in particular, the role of the then intergovernmental satellite organizations (ISOs) INTELSAT and Inmarsat. The report required by the legislation monitors the implementation and enforcement of other nations' commitments under the OECD Convention and tracks the reduction of privileges and immunities for the ISOs. This Request for Comments (RFC) will assist the Secretary of Commerce in responding to those reporting requirements.

Moreover, on March 17, 2000, the President signed into law the Open-Market Reorganization for the Betterment of International Telecommunications (ORBIT) Act, Pub. L. No. 106-180. This legislation seeks to "promote a fully competitive global market for satellite communications services for the benefit of consumers and providers of satellite services and equipment by fully privatizing the intergovernmental satellite organizations, INTELSAT and Inmarsat." Id. at sec. 2. In addition, the ORBIT Act requires the President to provide an annual report to Congress on the progress of privatization in relation to the objectives, purposes, and provisions of the Act, including the "(v)iews of the industry and consumers on privatization" and the "[i]mpact privatization has had on United States industry, United States jobs, and United States industry's access to the global marketplace." See id. at sec. 646(b)(3) and (4). By this public notice and RFC, we are also soliciting the views of the industry and consumers on such privatization.

DATES: Comments must be received by May 8, 2000.

ADDRESSES: The Department invites the public to submit written comments in paper or electronic form. Comments may be mailed to Milton Brown, National Telecommunications and Information Administration (NTIA), Room 4713, U.S. Department of Commerce, 14th and Constitution

¹The Department notes that Inmarsat privatized on April 15, 1999 and therefore this section of the RFC is limited to INTELSAT.

Avenue, NW, Washington, DC 20230. Paper submissions should include a version on diskette in ASCII, Word Perfect (please specify version), or Microsoft Word (please specify version) format.

Comments submitted in electronic form may be sent to privatization@ntia.doc.gov. Electronic comments should be submitted in the formats specified above.

FOR FURTHER INFORMATION CONTACT: Milton Brown, NTIA/OCC, (202) 482–1816.

SUPPLEMENTARY INFORMATION:

Background

INTELSAT is a treaty-based global communications satellite cooperative with 143 member countries. INTELSAT was created to enhance global communications and to spread the risks of creating a global satellite system across telephone operating companies from many countries. Inmarsat was created to improve the global maritime communications satellite system that would provide distress, safety, and communications services to seafaring nations in a cooperative, cost-sharing entity. Inmarsat privatized on April 15, 1999.

As an intergovernmental satellite organization, INTELSAT is governed by "Parties" and managed by "signatories." The Parties are the national government members of the organizations who have signed the INTELSAT Agreement. Signatories are designated by each party to participate in the commercial operations of the organization. They hold ownership interests in varying degrees. They also assist with the operation and management of the systems and are distributors of ISO services in their own countries. Signatories may be government-owned or controlled telecommunications monopolies or other telecommunications service providers. The publically traded Comsat Corporation (Comsat) is the U.S. Signatory to INTELSAT.3 INTELSAT is subject to oversight by the Assembly of Parties, and signatories are subject to oversight by their respective governments.

To implement public service obligations effectively and as part of INTELSAT's unique treaty status as an international organization, it benefits from certain privileges and immunities. As such, it is generally immune from suit, including private or public prosecution on antitrust charges.⁴ Moreover, INTELSAT does not pay taxes on revenues, and exemptions extend to import duties and taxes, communications and property taxes. Signatories, however, are subject to national taxes, including taxes on their share of the organization's distributed returns.

The International Anti-Bribery and Fair Competition Act of 1998, Pub. L. 105-366, requires the Secretary of Commerce to submit a report to the House of Representatives and the Senate that contains information regarding the OECD Convention including the following: (1) A list of countries that have ratified the Convention; (2) a description of the domestic laws enacted by each party to the Convention that implements commitments under the Convention; and (3) an assessment of the measures taken by each party to the Convention during the previous year to fulfill its obligations under the Convention. See Pub. L. 105-366, sec. 6(a). Accordingly, the Secretary of Commerce is required to report, inter alia, on the "terms of market access, government ownership, government contracts or connections, privileges and immunities, favorable treatment by national regulatory authorities or tax treatment * * * in the countries or regions served by the (INTELSAT), and the reasons for such advantages." H.R. Rep. No. 105-802, at 9 (1998). In preparation for this report, the Secretary of Commerce is required to seek and incorporate comments from the private sector, including competing satellite companies and satellite services users. Id. The Secretary of Commerce issued the first report in July 1999. See Addressing the Challenges of International Bribery and Fair Competition—The First Annual Report Under Section 6 of the International Anti-Bribery and Fair Competition Act of 1998, July 1999. The report may be viewed at http://www.ita.doc.gov/legal/ master.html.

We are now formally soliciting public comment for the Secretary's second annual report on the advantages, in terms of immunities, market access, or otherwise, in the countries or regions served by INTELSAT, the reasons for such advantages, and an assessment of progress toward fulfilling a procompetitive privatization of this organization. "Pro-competitive

privatization" is defined as "privatization that the President determines to be consistent with the United States policy of obtaining full and open competition to such organizations (or their successors), and nondiscriminatory market access, in the provision of satellite services." See Pub. L. 105–366, sec. 5(a)(2). Respondents may find it useful to review the full text of the International Anti-Bribery and Fair Competition Act of 1998.

On March 17, 2000, the President signed into law the Open-market Reorganization for the Betterment of International Telecommunications (ORBIT) Act. Pub. L. 106-180. The purpose of the ORBIT Act is "to promote a fully competitive global market for satellite communications services for the benefit of consumers and providers of satellite services and equipment by fully privatizing the intergovernmental satellite organizations, INTELSAT and Inmarsat." Id. at sec. 2. To achieve this goal, the ORBIT Act provides specific criteria for licensing and market access for INTELSAT, Inmarsat and New Skies Satellites, and changes the statutes affecting Comsat. In addition, the ORBIT Act requires the President to provide an annual report to Congress on the progress of privatization in relation to the objectives, purposes, and provisions of the Act including the "(v)iews of the industry and consumers on privatization" and the "(i)mpact privatization has had on United States industry, United States jobs, and United States industry's access to the global marketplace." See id. at section 646(b)(3) and (4). By this public notice and RFC, we are also soliciting the views of the industry and consumers on the privatization of INTELSAT and Inmarsat with respect to the goals of achieving a pro-competitive privatization of these organizations. Respondents may find it useful to review the full text of the ORBIT Act.

Kathy Smith,

Chief Counsel.
