NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, DG-1095 (which should be mentioned in all correspondence concerning this draft guide), is titled "Guidance for Implementation of 10 CFR 50.59, 'Changes, Tests and Experiments.'" This guide is being developed to describe methods acceptable to the NRC staff for complying with the NRC's regulations with regard to the process for evaluating changes, tests, and experiments that a licensee wishes to make without prior NRC approval. A letter has been issued as part of the guide to request public comments on specific questions related to the guidance. This guide proposes to endorse, with some clarifications, a Nuclear Energy Institute document, Revision 1 of NEI 96-07, "Guidelines for 10 CFR 50.59 Evaluations."

This draft guide has not received complete staff approval and does not represent an official NRC staff position.

Comments may be accompanied by relevant information or supporting data. Written comments may be submitted to the Rules and Directives Branch, Office
