## **INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO**

### **United States Section; Notice of Intent To Prepare an Environmental Impact Statement for the Rio Grande Rectification Project El Paso and Hudspeth Counties, Texas**

**AGENCY:** United States Section,  
International Boundary and Water  
Commission, United States and Mexico.

**ACTION:** Notice of Intent to Prepare an  
Environmental Impact Statement (EIS).

**SUMMARY:** This notice advises the public that pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA), as amended, and dependent on availability of funding, the United States Section, International Boundary and Water Commission (USIBWC) proposes to gather information necessary to analyze and evaluate the impacts of a River Management Plan by the USIBWC on the existing Rio Grande Rectification Project in El Paso and Hudspeth counties, Texas and prepare an EIS to document those effects. This notice is being provided as required by the Memorandum of Understanding between the USIBWC and Southwest Environmental Center, dated March 22, 1999; the Council on Environmental Quality Regulations (40 CFR 1501.7); and the USIBWC's Operational Procedures for Implementing Section 102 of the National Environmental Policy Act of 1969, published in the **Federal Register** September 2, 1981 (46 FR 44083-44094) to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the EIS.

**DATES:** Written comments will be accepted for an indefinite period of time from the date of this notice and

continuing until receipt of appropriation funds necessary for completion of the EIS. Participation by interested federal, state, and local agencies as well as other interested organizations and the general public is encouraged during this indefinite scoping period. Public comments on the scope of the EIS, reasonable alternatives that should be considered, anticipated environmental problems, and actions that might be taken to address them are requested.

#### **FOR FURTHER INFORMATION CONTACT:**

Comments will be accepted following the date of this notice by Mr. Douglas Echlin, Environmental Protection Specialist, Environmental Management Division, USIBWC, 4171 North Mesa Street, C-310, El Paso, Texas 79902. Telephone: 915/832-4741, Facsimile: 915/832-4167. E-mail: dougechlin@ibwc.state.gov.

**SUPPLEMENTARY INFORMATION:** The USIBWC proposes, pending appropriation of funds, to gather information necessary for the preparation of an EIS to be used to determine specific options for the maintenance of the Rio Grande Rectification Project (Rectification Project) that could be implemented to minimize, consistent with the law and international agreements, the impact of project maintenance on ecological and environmental resources in the area and to optimize the safety of people and property through flood management. The Rectification Project is located along the Rio Grande in El Paso and Hudspeth counties, Texas. It is an international project that provides a means of stabilizing the international boundary line between the United States and Mexico in the El Paso-Juarez valley and also provides flood protection to urban, suburban and agricultural lands in this valley. In 1927, the International Boundary Commission (now the International Boundary and Water Commission or IBWC), formulated plans for the rectification of the river and stabilization of the international boundary line in the El Paso-Juarez valley to serve as a basis for a Convention between the United States and Mexico authorizing the construction of necessary works. The initial construction on the Rectification Project was begun in March, 1934, and completed in 1938. Subsequently, in the period from 1943 through 1950, supplemental work was done which consisted of raising levees upstream from Riverside Canal Heading, revetting levees opposite arroyo entrances, revetting channel banks, and levelling floodways.

The USIBWC as lead agency proposes to collect information necessary for the preparation of an EIS; to analyze flood protection measures and alternatives to current management, including watershed-oriented and non-structural alternatives and collaborative measures with other agencies and landowners; to determine to what extent project management can support restoration of native riparian and aquatic habitats, as well as the restoration of natural fluvial processes such as channel meanders and overbank flooding. The EIS will consider a range of alternatives, including the no action alternative, based on issues and concerns associated with the project.

The EIS will identify, describe, and evaluate the existing environmental, cultural, sociological and economical, and recreational resources; explain the existing international flood protection and boundary stabilization project; and evaluate the impacts associated with the alternatives under consideration. Significant issues which have been identified to be addressed in the EIS include but are not limited to impacts to water resources, water quality, cultural and biological resources, threatened and endangered species, and recreation.

The USIBWC seeks funding for river levee improvements along the international boundary; and pending appropriation of funds, proposed construction activities that will be studied in this EIS include rehabilitation of existing levees, channel improvements such as widening or armoring with riprap, and installation of grade control structures. Required work consists of evaluating the integrity of the levee system by conducting a series of geotechnical explorations and analysis to identify where levee rehabilitation is required. The levee rehabilitation work involves the replacement of unstable reaches, reconditioning of the levee side slopes, levee road resurfacing, and replacement of existing structure gates. The levee system would be evaluated and arrangements worked with Mexico for levee rehabilitation in both countries with an equal distribution of costs. The proposed project also seeks to evaluate best management practices regarding flood control, boundary river preservation, and flood plain management, taking into account the project riparian ecosystem. In addition, the EIS will study the environmental effects of a long-range maintenance plan that will be developed.

Coordination with the United States Fish and Wildlife Service will ensure compliance with the Fish and Wildlife Coordination Act and section 7 of the

Endangered Species Act of 1973, as amended. Cultural resources reconnaissance for the project area will be coordinated with the Texas State Historic Preservation Officer. Other federal and state agencies, as required, will also be consulted to ensure compliance with federal and state laws and regulations.

The environmental review of this project will be conducted in accordance with the requirements of NEPA, CEQ Regulations, other appropriate federal regulations, and the USIBWC procedures for compliance with those regulations. When the EIS is completed, copies will be transmitted to federal and state agencies and other interested parties for comments. It will be filed with the Environmental Protection Agency in accordance with 40 CFR Parts 1500–1508 and USIBWC procedures. The USIBWC estimates, pending receipt of funds necessary for completion, the Draft EIS will be completed within three years of receipt of those funds.

Dated: January 5, 2000.
