

received on the DEIS and these are included with responses in the FEIS.

The FEIS analyzes three alternatives. The Proposed Action is to hold a competitive sealed-bid sale and issue a lease for the tract as applied for to the successful qualified bidder, if the bid meets or exceeds the fair market value of the tract as determined by the BLM. This is the preferred alternative of the BLM. The second alternative, Alternative 1, is the No Action Alternative which assumes that the tract will not be leased. The third alternative, Alternative 2, is to hold a competitive sealed-bid sale and issue a lease for the tract as modified by BLM to the successful qualified bidder, if the bid meets or exceeds the fair market value of the tract as determined by the BLM.

The Office of Surface Mining Reclamation and Enforcement is a cooperating agency in the preparation of the EIS because it is the Federal agency that would review the mining plans for the tract if it is leased, and recommend approval or disapproval of the mining plans to the Secretary of the Interior.

The lease application area is within the boundaries of the Thunder Basin National Grasslands. Some of the surface lands in the area were formerly under the jurisdiction of the United States and were administered by the U.S. Forest Service (USFS) as part of the Thunder Basin National Grasslands. As a result of recent land exchanges between the USFS and local landowners, however, there are no longer any surface lands within the lease application area that are under the jurisdiction of the USFS, and as a result, the USFS is not a cooperating agency in the preparation of this EIS.

Issues of concern that were identified related to this lease application include the potential impacts to wetlands, aquifers, agricultural producers, wildlife, wildlife habitat, wildlife-based recreation, cultural resources, public land access, and regional visibility that may occur if a lease is issued for this tract, and the potential for conflict with development of existing oil and gas leases in this area including coal bed methane. There are no producing oil or gas wells on the lease application area.

Comments received on the FEIS during the 30-day availability period, including names and street addresses of respondents, will be available for public review at the Bureau of Land Management, Casper Field Office, 2987 Prospector Drive, Casper, Wyoming, during regular business hours (8 a.m. to 4:30 p.m.), Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish to withhold your name or street address

from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives of officials of organizations or businesses, will be made available for public inspection in their entirety.
