I. Abstract

The National Marine Fisheries Service (NMFS) has established a Sea Scallop Exemption Program (SEP) in the northeast region of the U.S. The SEP allows sea scallop fishermen to fish within certain areas closed to the northeast multispecies fishery. NMFS requires reporting by participants to allow it to enforce regulations and manage the fishery. The Office of Management and Budget (OMB) gave emergency Paperwork Reduction Act clearance to these reporting requirements on June 13, 2000. This Notice solicits public comment on a proposed request to OMB for regular clearance for these requirements. It also solicits comment on a proposal to expand the nature of the requirements. The approval obtained from OMB was limited to specifically identified exemption areas. NMFS proposes to request clearance for these requirements to apply to any other exemption areas that may be named.

The requirements currently approved are: (1) vessels not already equipped with a Vessel Monitoring System (VMS) must install one to allow NMFS to monitor the location of the vessel; (2) vessels installing a new VMS must submit verification of that installation; (3) vessels intending to participate in the SEP must notify NMFS of that intent no later than 15 days prior to the scheduled opening of an exemption area; (4) vessels participating must notify NMFS at least 5 days prior to departing on a trip to an exemption area in order to allow possible assignment of observers; (5) vessels on a trip to an exemption area must provide daily reporting via their VMS unit on their catch and related information; and (6) the VMS unit on vessels on a fishing trip to an exemption area must provide automatic position information twice each hour.

II. Method of Collection

The verification requirement of VMS installation is made by submission of a paper document. Notification requirements and all VMS reporting is done electronically via the VMS unit.
