The NPRM notes that, under a five percent or greater ownership threshold, fewer entities will be required to obtain licenses than under the current practice. This means that fewer entities will be subject to the conditions and responsibilities that come with the right to land or operate a cable. The NPRM seeks comment on whether a different percentage would be appropriate to accomplish these goals. In addition, the NPRM provides that an entity that is a licensee for an existing submarine cable but does not own a landing station and has less than a five percent ownership interest in the cable, may file with the Commission a request that its license be relinquished.
