II. Test Data Submissions

Under 40 CFR 790.60, all TSCA section 4 enforceable consent agreements/orders must contain a statement that results of testing conducted pursuant to enforceable consent agreements/orders will be announced to the public in accordance with section 4(d) of TSCA.

Test data for N-methylpyrrolidone (NMP) were submitted by the NMP Producers Group on behalf of the member companies: Lyondell Chemical Company (formerly ARCO Chemical Company), BASF Corporation, and ISP Management Company, Inc. These data were submitted pursuant to a TSCA section 4 enforceable consent agreement/order and were received by EPA on November 23, 1999. The submission includes a final report entitled "N-Methylpyrrolidone - Carcinogenicity study in B6C3F1 mice; Administration in the diet for 18 months." NMP is an inert, stable, polar solvent that is used in a wide variety of processes. Its commercial uses result from its strong and frequently selective solvent power. One of the major uses of NMP is the extraction of aromatics from lubricating oils. It is also used as a medium for polymerization and as a solvent for finished polymers. It is the preferred solvent in a variety of chemical reactions and the manufacture of numerous chemical intermediates and products such as plastics, surface coatings, and pesticides. An important use of this chemical is as a substitute for methylene chloride in paint strippers. NMP is also used in the recovery and purification of acetylenes, olefins, and diolefins, in the removal of sulfur compounds from natural and refinery gasses, and in the dehydration of natural gas.

EPA has initiated its review and evaluation process for this submission. At this time, the Agency is unable to provide any determination as to the completeness of the submission.

Needs and Uses: In the 800 MHz Second Report and Order, the Commission established a flexible regulatory scheme for the 800 MHz Specialized Mobile Radio (SMR) service to promote efficient licensing and enhance the service's competitive potential in the commercial mobile radio marketplace. The rules adopted in the 800 MHz Second Report and Order also implement Congress's goal of regulatory symmetry in the regulation of

competing commercial mobile radio services (CMRS) as described in Sections 3(n) and 332 of the Communications Act of 1934, as amended, 47 U.S.C. 153(n), 332 (Communications Act), as amended by Title VI of the Omnibus Budget Reconciliation Act of 1993. In the Second Report and Order, the Commission also adopted rules regarding competitive bidding for the remaining 800 MHz SMR spectrum based on Section 309(j) of the Communications Act, 47 U.S.C. 309(j), which authorizes the Commission to use auctions to select among mutually exclusive initial applications in certain services, including the 800 MHz SMR service. The actions taken in this Memorandum Opinion and Order on Reconsideration are in response to petitions for reconsideration or clarification of the 800 MHz Second Report and Order. Throughout this proceeding, we have sought to promote Congress' goal of regulatory parity for all commercial mobile radio services, and to encourage the participation of a wide variety of applicants, including small businesses, in the SMR industry. In addition, we have sought to establish rules for the SMR services that will streamline the licensing process and provide a flexible operating environment for licensees, foster competition, and promote the delivery of service to all areas of the country, including rural areas.
