The Proposal

The FAA is considering an amendment to 14 CFR part 71 to modify Class E airspace at Watertown, SD, and Britton, SD, to accommodate aircraft executing instrument flight procedures into and out of numerous airports in southeastern North Dakota, northeastern South Dakota, and western Minnesota. Several small portions of uncontrolled airspace between Wahpeton, ND, and Brookings, SD, created as a result of the cancellation of a portion of Federal Airway 220 (V-220), Airspace Docket No. 98-AGL-49, published September 7, 1999 (64 FR 48527), would be eliminated. The area would be depicted on appropriate aeronautical charts. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that his proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to modify Class E airspace at Saginaw, MI, to accommodate aircraft executing the proposed GPS Rwy 27 SIAP at Saginaw County H.W. Browne Airport by modifying the existing controlled airspace. Controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the approach. The area would be depicted on appropriate aeronautical

charts. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Certification of Screening Companies

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of public meeting.

SUMMARY: The FAA announces a public meeting to be held on the subject of "Certification of Screening Companies; Notice of Proposed Rulemaking" (65 FR 560, January 5, 2000). In that notice, the FAA proposes to require that all companies that perform aviation security screening be certificated by the FAA and meet enhanced requirements. The proposal is in response to a recommendation by the White House Commission on Aviation Safety and Security and to a Congressional mandate in the Federal Aviation Reauthorization Act of 1996. The proposal is intended to improve the screening of passengers, accessible property, checked baggage, and cargo; and to provide standards for consistent high performance and increased screening company accountability.

DATES: The public meeting will be on March 10, 2000, in Washington, DC. The
