

residues resulting from current and proposed uses.

2. *Infants and children*—i. *Safety factor*. FFDC section 408 provides that EPA may apply an additional safety factor (up to 10) in the case of threshold effects for infants and children to account for prenatal and postnatal toxicity and the completeness of the data base. Except for the pending request for a developmental neurotoxicity study, the toxicity data base is complete for halosulfuron-methyl. Based upon reliable toxicity data, the use of an additional 10x safety factor is not warranted. Dietary assessments do not indicate a level of concern for potential risks to infants and children based upon the low use rates of halosulfuron-methyl and that the results of field and animal RAC studies conclude that detectable residues are not expected in human foods.

ii. *Acute risk*. The acute RfD was determined to be 0.5 mg/kg/day based upon the developmental rabbit study. The percent of the acute RfD occupied is 0.72% for the U.S. population, 0.45% for females 13+ years not pregnant or nursing, and 1.61% for non-nursing infants (<1 year old). The subgroup with the highest exposure were non-nursing infants and children. The DWLOC for acute exposure for infants and children is 5,000 mg/L and is significantly less than the maximum concentration of halosulfuron-methyl in drinking water (0.008 mg/L in ground water and 4.3 mg/L in surface water).

iii. *Chronic risk*. The cRfD was determined to be 0.1 mg/kg/day based upon the chronic dog study. The percent of RfD occupied is 3.5% for the most sensitive subgroup, children (1-6 years old). The DWLOC for chronic exposure for infants and children is 1,000 mg/L and is significantly less than the maximum concentration of halosulfuron-methyl in drinking water (0.008 mg/L in ground water and 1.1 mg/L in surface water).

iv. *Short- and intermediate-term risk*. An aggregate exposure estimate and risk assessment was calculated for post-application exposure to halosulfuron-methyl from treated lawns. Short-term MOEs for food, residential oral, and residential dermal are 6,200, 4,900, and 420, respectively, for infants and children. Intermediate-term MOEs for food, residential oral, and residential dermal are 2,900, 1,500, and 130, respectively, for children and infants. The short- and intermediate-term DWLOCs for infants and children were 3,700 and 160 mg/L, respectively, which are substantially higher than the drinking water EECs for acute surface

water (4.3 mg/L) and chronic surface water (1.1 mg/L).

v. *Conclusion*. Therefore, based on complete and reliable toxicity data and the conservative exposure assessment, Monsanto concludes that there is reasonable certainty that no harm will result to infants and children from aggregate exposure to halosulfuron-methyl residues with respect to the proposed new uses on squash/cucumber subgroup of the cucurbit vegetable group.

F. *International Tolerances*

Maximum residue levels have not been established for residues of halosulfuron-methyl on any food or feed crop by the Codex Alimentarius Commission.

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed settlement.

SUMMARY: Under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the United States Environmental Protection Agency (EPA) proposes to enter into a "prospective purchaser agreement" (PPA) concerning property owned by the Ware Shoals Power and Water, Inc. (WSPW), in Greenwood County, South Carolina. EPA proposes to enter into the PPA with the Town of Ware Shoals. The PPA concerns the acquisition by the Town of Ware Shoals of certain real property presently owned by the WSPW in Ware Shoals, Greenwood County, South Carolina.

The real property in question consists of a 27 acre tract located at 12 Mill Street, East Main Street and Honea Path Street, Ware Shoals, Greenwood County, South Carolina. The Property is the subject of an Agreement to transfer the property from WSPW to the Town of Ware Shoals. Pursuant to the PPA, the Settling Respondent agrees to conduct further environmental assessment at the Site pursuant to a Voluntary Contract with the South Carolina Department of Health and Environmental Control. The PPA will also settle and resolve, subject to reservations and limitations contained in the PPA, the potential liability of the Settling Respondent for the Existing Contamination as defined in the PPA at the Property which may otherwise result from Settling Respondent becoming the owner of the property. The Town of Ware Shoals will be protected from CERCLA liability for past costs which may arise from their participation in the acquisition of the Property, as described above.

EPA will consider public comments on the proposed settlement for thirty (30) days. EPA may withdraw from or modify the proposed settlement should public comments disclose facts or considerations which indicate the proposed settlement is inappropriate, improper or inadequate.
