Respondents: Business or other for-profit.

Number of Respondents: 15.

Applicants must demonstrate that any new area predicted to lose service as a result of interference has adequate service remaining. In addition, licensees are required to serve a copy of any application for co-channel or first-adjacent channel stations proposing predicted interference caused in any area where interference is not currently predicted to be caused upon the licensee(s) of the affected short-spaced station(s).

The data are used by Commission staff to determine if the public interest will be served and that existing levels of interference will not be increased to other licensed stations. Providing copies of application(s) to affected licensee(s) will enable potentially affected parties to examine the proposals and provide them an opportunity to file informal objections against such applications.
