

and 220.830. Each of these regulatory provisions states that the applicable rates of interest will be published twice each year as a notice in the **Federal Register**.

Section 224 further provides that the interest rate on these debentures will be set from time to time by the Secretary of HUD, with the approval of the Secretary of the Treasury, in an amount not in excess of the annual interest rate determined by the Secretary of the Treasury pursuant to a statutory formula based on the average yield of all outstanding marketable Treasury obligations of maturities of 15 or more years.

The Secretary of the Treasury (1) has determined, in accordance with the provisions of Section 224, that the statutory maximum interest rate for the period beginning July 1, 2000, is 6½ percent and (2) has approved the establishment of the debenture interest rate by the Secretary of HUD at 6½ percent for the 6-month period beginning July 1, 2000. This interest rate will be the rate borne by debentures issued with respect to any insured loan or mortgage (except for debentures issued pursuant to Section 221(g)(4)) with an insurance commitment or endorsement date (as applicable) within the last 6 months of 2000.

For convenience of reference, HUD is publishing the following chart of debenture interest rates applicable to mortgages committed or endorsed sine January 1, 1980:

6½	July 1, 2000	Jan. 1, 2000.

Section 221(g)(4) of the Act provides that debentures issued pursuant to that paragraph (with respect to the assignment of an insured mortgage to the Secretary) will bear interest at the "going Federal rate" of interest in effect at the time the debentures are issued. The term "going Federal rate" is defined to mean the interest rate that the Secretary of the Treasury determines, pursuant to a statutory formula based on the average yield on all outstanding marketable Treasury obligations of 8- to 12-year maturities, for the 6-month periods of January through June and July through December of each year. Section 221(g)(4) is implemented in the HUD regulations at 24 CFR 221.790.

The Secretary of the Treasury has determined that the interest rate to be borne by debentures issued pursuant to Section 221(g)(4) during the 6-month period beginning July 1, 2000, is 7½ percent.

HUD expects to publish its next notice of change in debenture interest rates in December 2000.

The subject matter of this notice falls within the categorical exemption from HUD's environmental clearance procedures set forth in 24 CFR 50.20(1). For that reason, no environmental finding has been prepared for this notice.

Availability of the Report of Injury Assessment and Injury Determination: Coeur d'Alene Basin Natural Resource Damage Assessment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Availability.

SUMMARY: The U.S. Department of the Interior (DOI), U.S. Department of Agriculture, and the Coeur d'Alene Tribe (collectively, the Trustees) have undertaken a natural resource damage assessment (NRDA) to assess injuries resulting from releases of hazardous substances from mining and mineral processing operations in the Coeur d'Alene River basin, Idaho. Section 107 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) [42 U.S.C. 9607], section 311 of the Federal Water Pollution Control Act [33 U.S.C. 1321], and the National Oil and Hazardous Substances Pollution Contingency Plan [40 CFR part 300] provide authority to the conduct the NRDA.

The Trustees evaluated injuries to natural resources in the Coeur d'Alene River basin resulting from releases of mining-related hazardous substances and summarized their findings in the Report of Injury Assessment and Injury Determination: Coeur d'Alene Basin Natural Resource Damage Assessment (Report). Trustees used the Coeur d'Alene Basin Natural Resource Damage Assessment Plan, Injury Determination—Phase I, released in October 1993, and the Coeur d'Alene Basin Natural Resource Damage Assessment Plan, Phase II—Injury Quantification/Damage Determination, released in June 1996, guide the NRDA process.

Natural resources of the Coeur d'Alene River basin that were assessed for injury include: surface water; groundwater; bed, bank, and shoreline sediments; riparian and floodplain soils; aquatic biota, including both fish and aquatic invertebrates; wildlife, including birds, mammals, reptiles, amphibians; and vegetation. The areas assessed for natural resource injuries includes the South Fork Coeur d'Alene River basin, tributary drainages to the South Fork Coeur d'Alene River in which mining and milling occurred, the mainstem Coeur d'Alene River and associated lateral lakes and wetlands, and Coeur d'Alene Lake from the area near Conkling Point to the Spokane River.

The Report sets forth the data and analysis of information obtained by the

Trustees during the Phase I and II injury determination studies combined with a comprehensive review and analysis of previously existing information concerning the natural resources in the Coeur d'Alene Basin. Authorized Trustee representatives adopted the Report and its findings in September 2000 and are now making it available for use by other agencies and the public.
