**SUPPLEMENTARY INFORMATION:** Western intends to prepare an EIS regarding the proposal by PPL Global to construct an electric generating facility on private property and to interconnect this facility with an existing Western transmission line and Western's grid in the vicinity of Coolidge, Arizona. Two 4.5-mile long transmission lines would connect the proposed power generating facility with a point of interconnection on Western's Liberty-Coolidge 230 kilovolt (kV) transmission line west of Coolidge. In

addition, a 1.5 mile, 230-kV transmission line would connect the powerplant with Western's Signal Substation. An existing 115-kV transmission line from Signal Substation would be upgraded to 230-kV and other work inside Signal Substation would be required.

PPL Global proposes to construct the Sundance Energy Project on private lands in Pinal County, approximately 5 miles southwest of Coolidge, Arizona. The Project would be a nonutility merchant plant that would sell power during peak demand periods to wholesale-only contract or spot market customers. All economic costs of the project will be born by PPL Global.

The Project would consist of a nominal 600-megawatt natural gas-fired simple-cycle peaking facility and on-site supporting infrastructure including: an administration building, warehouse storage, water treatment facilities, inlet air cooling system to optimize inlet air combustion, gas conditioning equipment, and new on-site access roads. The Project would be designed to operate primarily during on-peak hours. The Project's water consumption would be about 600 acre/feet per year. The water source would be excess Central Arizona Project water delivered through an existing irrigation canal at the site, a new groundwater well, or a combination of both. The generating facility and infrastructure would occupy less than 40 acres of a 280-acre parcel of rural property controlled by PPL Global. Additional proposed on-site facilities would include an interconnection with an existing natural gas transmission pipeline that runs through the Project property and the construction of 14 miles of natural gas pipeline to connect with another existing natural gas transmission pipeline southwest of the proposed powerplant.

The Project would entail construction of new 230-kV transmission lines and the upgrade of Western's existing Signal-Coolidge 115-kV transmission line to 230-kV to interconnect with Western's existing Liberty-Coolidge 230-kV transmission line.

Because of the potential for incorporating new generation into Western's system, and the proposed interconnections with the existing system, Western has determined it must prepare an EIS in accordance with the U.S. Department of Energy's (DOE) NEPA Implementing Procedures found at 10 CFR 1021, Appendix D6 to Subpart D. Although State and local agencies are responsible for the siting and permitting of the proposed electric generating facility, the EIS will include the analysis of effects from construction

and operation of the generating facility as part of the proposed action.

The EIS will be prepared in accordance with the requirement of NEPA and DOE's NEPA Implementing Procedures in conjunction with the Council on Environmental Quality regulations. Full public participation and disclosure are planned for the entire EIS process. Western anticipates the EIS process will take about 15 months. It will include public information/scoping meetings; coordination and involvement with appropriate Federal, State, local, and tribal governments; public review and hearing on the published draft EIS; a published final EIS; and a Record of Decision (ROD). Publication of the ROD is anticipated in the fall of 2001.

Dated: September 29, 2000.

### III. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be amended to delete one or more uses. The Act further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, the Administrator may approve such a request.

### IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before April 16, 2001, unless indicated otherwise. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay

any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

### V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received by the Agency. This policy is in accordance with the Agency's statement of policy as prescribed in **Federal Register** (56 FR 29362) June 26, 1991; (FRL 3846-4). Exception to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an

earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.
