Second, site visiting teams will use information from the ARF in their assessments of the sites and will make recommendations to each

site of how the site can improve its project. Third, descriptive information from the ARF will be used to characterize each site's intervention in terms of the players involved, the services provided, the manner in which those services are integrated, and the manner in which C/S/R persons are

involved. These characterizations will inform the interpretation of the client-level data in the outcome study.

The estimated annual burden for these reporting requirements is summarized below.
