

located in Moss Point, Jackson County, Mississippi.

This consent decree represents a settlement between the United States, State of Mississippi and Morton. The consent decree requires Morton to: (1) Pay a penalty of \$20 million, with \$10 million being paid to the United States and \$10 million being paid to the State of Mississippi, (2) perform Supplemental Environmental Projects (SEPs) valued at \$16 million, (3) conduct a comprehensive analysis of conditions at the Facility, and (4) perform, if necessary, corrective measures at the Facility. In addition, the consent decree provides for audits to be conducted by a third party or parties at Morton chemical plants acquired by Rohm & Haas in 1999.

The SEPs include a Plant SEP which requires Morton to reduce or eliminate pollutants and to strive to terminate injection into deep wells as a method of disposal, a community SEP which provides for the rehabilitation or replacement of lateral sewer lines in the City of Moss Point, Mississippi, and the funding of a "Green Chemistry" project at the University of Southern Mississippi's School of Polymer Science. The Green Chemistry project is intended to develop architectural coatings which contain plant oils rather than volatile organic compounds. The community lateral line project will address inflow and infiltration which contributes to sewage overflows that plague Moss Point.
