BILLING CODE 4160-15-U

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the Advisory Committee on Organ Transplantation

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: Pursuant to Public Law 92-463, the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2) notice is hereby given of the first meeting of the Advisory Committee on Organ Transplantation (ACOT), Department of Health and Human Services (HHS). The meeting will be held from approximately 8:15 a.m. to 6:30 p.m. on May 1, 2001, and from 8:00 a.m. to 5:15 p.m. on May 2, 2001, at the Sheraton Suites, Old Town Alexandria, 801 North Saint Asaph Street, Alexandria, Virginia 22314. The meeting will be open to the public; however, seating is limited and pre-registration is encouraged (see below).

SUPPLEMENTARY INFORMATION: The ACOT will review the organ allocation policies submitted by the Organ Procurement and Transplantation Network (OPTN) to HHS for approval. There will be a limited period of time for public comment before the Committee considers each policy. The public may review the OPTN policies on the OPTN website www.unos.org. While public comments are welcome for possible presentation, please note that the

Committee will be working with a full agenda and a limited amount of time. Therefore, to facilitate this process, we recommend that individuals interested in providing public comments submit those comments in writing by April 20, 2001, to the Executive Director of the Committee (address below). The Department reserves the right to select comments from among those submitted for oral presentation within the time available, although it will include all comments in the record of the ACOT meeting.

Under the authority of 42 U.S.C. 217a, section 222 of the Public Health Service Act, as amended, and 42 CFR 121.12 (64 FR 56661), the ACOT was established to assist the Secretary in ensuring that the system of organ transplantation is grounded in the best available medical science and is as effective and equitable as possible, and thereby, enhance public confidence in the integrity and effectiveness of the transplantation system. The ACOT will review potentially enforceable OPTN policies and such other matters as the Secretary determines. The ACOT is composed of 20 voting, non-governmental individuals with diverse backgrounds in areas such as health care public policy, transplantation medicine and surgery, non-physician transplant professions, biostatistics, immunology, bioethics, law, transplant recipients, and a donor family representative.

The draft meeting agenda and a registration form are available on the Division of Transplantation's Web site: <http://www.hrsa.gov/osp/dot.htm>. The completed registration form should be submitted by facsimile to Betah Associates, Inc., the logistic support contractor for the meeting, at FAX number (301) 657-4258. Individuals without access to the Internet who wish to register may call Betah Associates, Inc., at (301) 657-4254, extension 228. Individuals who plan to attend the meeting and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the ACOT Executive Director, Ms. Lynn Rothberg Wegman, M.P.A., in advance of the meeting. Ms.

Wegman may be reached by telephone at (301) 443-7577, by e-mail at LWegman@hrsa.gov, or in writing at the address of the Division of Transplantation provided below. Management and support services for ACOT functions are provided by the Division of Transplantation, Office of Special Programs, HRSA, Room 7C-22, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

Dated: April 6, 2001.

Elizabeth M. Duke,

Acting Administrator, Health Resources and Services Administration.

BILLING CODE 4160-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General; Program Exclusions: March 2001

AGENCY: Office of Inspector General, HHS.

ACTION: Notice of program exclusions.

During the month of March 2001, the HHS Office of Inspector General imposed exclusions in the cases set forth below. When an exclusion is imposed, no program payment is made to anyone for any items or services (other than an emergency item or service not provided in a hospital emergency room) furnished, ordered or prescribed by an excluded party under the Medicare, Medicaid, and all Federal Health Care programs. In addition, no program payment is made to any business or facility, e.g., a hospital, that submits bills for payment for items or services provided by an excluded party. Program beneficiaries remain free to decide for themselves whether they will continue to use the services of an excluded party even though no program payments will be made for items and services provided by that excluded party. The exclusions have national effect and also apply to all Executive Branch procurement and non-procurement programs and activities.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health,
Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852-3804; telephone: 301/496-7057; fax: 301/402-0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

Vector Systems for the Generation of Adeno-Associated Virus Particles

JA Chiorini, R Kotin, B Safer, E Urcelay
(NHLBI)

Serial No. 08/157,740 filed 24 Nov 1993,
now US Patent 5,693,531 issued 02
Dec 1997

Licensing Contact: Susan S. Rucker;
301/496-7056 ext. 245; e-mail:
ruckers@od.nih.gov

This patent relates to a system for the production of recombinant AAV vectors for gene therapy. More particularly, the patent relates to an AAV vector system which utilizes an inducible system for the production of high titer virus. The first vector contains a 5' and 3' AAV ITR flanking the heterologous gene of interest to be delivered. The second vector contains an inducible origin of replication and the AAV rep and cap proteins. This second vector provides a means for increasing the amount of AAV structural proteins available for the production of infectious AAV particles. In the presence of the inducing agent these two vector are able to produce high titer of infectious AAV particles which can be used to deliver the heterologous gene of interest.

This work has been published, in part, at Chiorini, JA, et al. "High-efficiency transfer of the T cell co-stimulatory molecule B72 to lymphoid cells using high-titer recombinant adeno-associated virus vectors" *Hum Gene Ther* 6(12):1531-41 (Dec 1995).

Immunization from an Immunized Allogeneic Bone Marrow Donor

Larry W. Kwak, Dan L. Longo (NCI)
Serial No. 08/153,464 filed 17 Nov 1993;
U.S. Patent 5,861,158 issued 19 Jan
1999

Licensing Contact: Elaine White; 301/
496-7056 ext. 282; e-mail:
gesee@od.nih.gov

A novel method has been developed for transferring immunity against specific types of tumors from a bone marrow donor to a recipient. Although there have been major advances in studying the biology of B-cell and leukemia cancers in recent years, progress in the treatment of such diseases has been modest since the treatment of alkylating agents more than 30 years ago. An approach using intensive, high-dose chemoradiotherapy combined with bone marrow

transplantation (to help improve tolerance of bone marrow cells to intense therapy) is presently being explored by several groups of investigators. However, although this type of therapy has improved initial responsive rates, the vast majority of patients (90 percent) eventually relapse.

The current invention provides a method of improving a transplantation of hematopoietic cells from a donor to a recipient to treat a hematopoietic cell tumor in the recipient comprising immunizing the donor's hematopoietic cells with an antigen specific for the recipient's hematopoietic cell tumor, and transplanting the donor's immunized hematopoietic cells to the recipient. This method offers a novel means for conferring immunity against, and thereby treating, B-cell and leukemia cancers as well as other types of cancers.

A Murine Melanoma Transduced with CCR7 as a Model of Enhanced Metastasis to Lymph Nodes

Sam T. Hwang (NCI)
DHHS Reference No. E-104-01/0
Licensing Contact: Elaine White; 301/
496-7056 ext. 282; e-mail:
gesee@od.nih.gov

The current invention embodies a B16 murine melanoma cell line which has been stably transduced with the gene for CCR7, a gene which promotes the migration of activated dendritic cells into lymphatic vessels. This transduced cell line has been shown to metastasize much more efficiently to lymph nodes than non-transduced cells. While the spontaneous rate of metastasis to lymph nodes is quite low for non-transduced B16 cells, the inventor has found 200-1400 times more melanoma-specific mRNA in the lymph nodes of mice which have been injected with the CCR7-expressing melanoma cells. As melanoma in humans first metastasizes by invading the lymphatics and migrating to the draining lymph nodes, the transduced B16 cell line embodied in this invention appears to represent a
