

Notices

Federal Register

Vol. 66, No. 96

Thursday, May 17, 2001

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 00-097-1]

Notice of Request for an Extension of a Currently Approved Information Collection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of a currently approved information collection to gather data on West Nile virus.

DATES: We invite you to comment on this docket. We will consider all comments that we receive by July 16, 2001.

ADDRESSES: Please send four copies of your comment (an original and three copies) to: Docket No. 00-097-1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road, Unit 118, Riverdale, MD 20737-1238. Please state that your comment refers to Docket No. 00-097-1.

You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are

available on the Internet at <http://www.aphis.usda.gov/ppd/rad/webrepor.html>.

FOR FURTHER INFORMATION CONTACT: For information on the West Nile virus collection activities, contact Dr. Randall Crom, Senior Staff Veterinarian, Emergency Programs, Veterinary Services, APHIS, 4700 River Road Unit 41, Riverdale, MD 20737; (301) 734-8073. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734-7477.

SUPPLEMENTARY INFORMATION:

Title: West Nile Virus Surveillance Project.

OMB Number: 0579-0162.

Expiration Date of Approval: June 30, 2001.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS), Veterinary Services (VS), is responsible for protecting the health of our Nation's livestock and poultry by controlling and eradicating contagious, infectious, or communicable animal diseases. Veterinary Services' Emergency Programs unit coordinates APHIS' roles and responsibilities in planning for and responding to emerging or exotic animal diseases.

In 1999, West Nile virus (WNV), which can cause encephalitis, an inflammation of the brain, was first identified in the United States in wild birds, mosquitoes, humans, and equines. Clinical illness in humans and equines occurred during early August through late October 1999, with 62 human cases, including 7 deaths, and 25 equine cases, including 9 deaths. Because the virus is transmitted by mosquitoes, it has the potential to affect humans, livestock, and poultry. No treatment or vaccine is currently available.

In 2000, WNV was detected in humans, equines, other mammals, birds, and mosquitoes in the northeastern United States and in one crow in North Carolina. Of the 21 additional cases of WNV confirmed in humans in 2000, two deaths have been reported. Of the 59 cases confirmed in equines in 2000, 23 equines died or were euthanized. The equine cases were confirmed in Connecticut, Delaware, Massachusetts, New Jersey, New York, Pennsylvania,

and Rhode Island. The three equine cases in Delaware were the first cases of WNV to be documented in that State. Over 4,300 dead birds and 480 mosquito pools were documented as positive for WNV in 12 States and the District of Columbia. A dead crow tested positive for WNV in North Carolina, making that the first confirmation of the presence of WNV in that southeastern State. More data on the distribution of WNV is available online at <http://www.aphis.usda.gov/oa/wnv/wnvstats.html>.

Under an approved emergency information collection, data was collected on equines infected in 2000 from equine owners in up to five States in the northeastern United States. We collected data on equines infected in 2000, the premises on which they reside, and on equines and premises in the immediate area of the infected equines. We will analyze the data in an attempt to explain equine or premises risk factors for WNV infection. Extending the approval for an additional 3 years will allow additional epidemiologic data to be collected and analyzed.

We are asking the Office of Management and Budget (OMB) to approve the WNV information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of

information is estimated to average 1.125 hours per response.

Respondents: Equine owners.

Estimated annual number of respondents: 420.

Estimated annual number of responses per respondent: 2.

Estimated annual number of responses: 840.

Estimated total annual burden on respondents: 945 hours.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of May 2001.

Richard L. Dunkle,

Acting Administrator, Animal and Plant Health Inspection Service.

Animal and Plant Health Inspection Service

[Docket No. 01-009-2]

Wildlife Services; Availability of Environmental Assessment

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared an environmental assessment for oral rabies vaccination programs in several States. The environmental assessment analyzes the potential environmental effects of a proposal to continue and expand the Agency's involvement in programs to stop the spread of certain wildlife-borne rabies strains in the States of New York, Ohio, Texas, Vermont, and West Virginia, and examines similar efforts that may be conducted in New Hampshire, Pennsylvania, Florida, Massachusetts, Maryland, New Jersey, Virginia, and Alabama. We are making this environmental assessment available to the public for review and comment prior to an Agency decision.

DATES: We will consider all comments that we receive by June 18, 2001.

ADDRESSES: Please send four copies of your comment (an original and three copies) to: Docket No. 01-009-2, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737-1238. Please state that your comment refers to Docket No. 01-009-2.

To obtain a copy of the environmental assessment, contact Elizabeth Harris, Operational Support Staff, Wildlife Services, APHIS, 4700 River Road Unit 87, Riverdale, MD 20737-1234; phone (301) 734-7921, fax (301) 734-5157, or e-mail: elizabeth.harris@aphis.usda.gov. You may also read the environmental assessment and any comments we receive on this notice of availability in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at <http://www.aphis.usda.gov/ppd/rad/webrepor.html>.

FOR FURTHER INFORMATION CONTACT:

Dennis Slate, Rabies Program Coordinator, Wildlife Services, APHIS, 59 Chennell Drive, Suite 7, Concord, NH 03301-8548; phone (603) 223-6832.

SUPPLEMENTARY INFORMATION:

Background

The Wildlife Services (WS) program in the Animal and Plant Health Inspection Service (APHIS) cooperates with Federal agencies, State and local governments, and private individuals to research and implement the best methods of managing conflicts between wildlife and human health and safety, agriculture, property, and natural resources. Wildlife-borne diseases that can affect domestic animals and humans are among the types of conflicts that APHIS-WS addresses. Wildlife is the dominant reservoir of rabies in the United States.

On December 7, 2000, a notice was published in the **Federal Register** (65 FR 76606-76607, Docket No. 00-045-1) in which the Secretary of Agriculture declared an emergency and transferred funds from the Commodity Credit Corporation to APHIS-WS for the continuation and expansion of oral rabies vaccination (ORV) programs to address rabies in the States of Ohio, New York, Vermont, Texas, and West Virginia.

On March 7, 2001, we published a notice in the **Federal Register** (66 FR 13697-13700, Docket No. 01-009-1) to solicit public involvement in the planning of a proposed cooperative

program to stop the spread of rabies in the States of New York, Ohio, Texas, Vermont, and West Virginia. The notice also stated that a small portion of northeastern New Hampshire and the western counties in Pennsylvania that border Ohio could also be included in these control efforts, and discussed the possibility of APHIS-WS cooperating in smaller-scale ORV projects in the States of Florida, Massachusetts, Maryland, New Jersey, Virginia, and Alabama. The March 2001 notice contained detailed information about the history of the problems with raccoon rabies in eastern States and with gray fox and coyote rabies in Texas, along with information about previous and ongoing efforts using ORV baits in programs to prevent the spread of the rabies strains of concern.

To provide the public with documentation of APHIS' review and analysis of the environmental impacts associated with the proposed rabies control programs discussed in the March 2001 notice, we have prepared an environmental assessment (EA). The EA was prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

This EA reflects our review and consideration of the comments received in response to the March 2001 notice, as well as a number of issues and alternatives identified during the preparation of previous EA's covering ORV use in earlier, State-level ORV programs. The EA is now available for public review and comment prior to an Agency decision.

Done in Washington, DC, this 11th day of May 2001.

Richard L. Dunkle,

Acting Administrator, Animal and Plant Health Inspection Service.
