Notice of Availability of Funds; Cooperative Agreement for 2001 National Breast and Cervical Cancer Early Detection Program

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2001 funds for a cooperative agreement program for the National Breast and Cervical Cancer Early Detection Program (NBCCEDP). This program addresses the "Healthy People 2010" priority area related to cancer.

The purpose of the NBCCEDP is to apply a State, territorial, or tribal public health approach to increase access to and use of screening services. The NBCCEDP was established through the Breast and Cervical Cancer Mortality Prevention Act of 1990 (Public Law 101-354) and provides screening services for low income women. Funded programs will establish a comprehensive breast and cervical cancer early detection screening program that includes the following program components: breast and cervical cancer screening, tracking, follow-up and case management; public education and outreach; professional education; quality assurance and improvement; surveillance and evaluation; coalitions and partnerships; and management, hereafter referred to as the NBCCEDP program components.

The President has committed the nation to an ambitious goal: by the year 2010, to eliminate the disparities in health status experienced by racial and ethnic minority populations. The NBCCEDP has been established to move closer to this goal by addressing the deficits in breast and cervical cancer screening and management among these women.
