

Revenue Procedure Number: Revenue Procedure 98–32.

Abstract: This revenue procedure provides information about the Electronic Federal Tax Payment System (EFTPS) programs for Batch Filers and Bulk Filers (Filers). EFTPS is an electronic remittance processing system for making federal tax deposits (FTDs) and federal tax payments (FTPs). The Batch Filer and Bulk Filer programs are used by Filers for electronically submitting enrollments, FTDs, and FTPs on behalf of multiple taxpayers.

Current Actions: The number of Bulk and Batch filers participating in the EFTPS has increased due to two factors. First, the Service eliminated its magnetic tape program for the reporting of federal tax deposits and certain estimated income tax payments effective with respect to deposits or payments made after January 31, 2000. Secondly, the number of taxpayers required by the regulations issued under § 6302(h) of the Code to make FTDs using EFTPS has increased.

Type of Review: Revision of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1,500.

Estimated Time Per Respondent: 82 hours, 23 minutes.

Estimated Total Annual Burden Hours: 123,567.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of

information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Title: A Study of Amyotrophic Lateral Sclerosis Among Gulf War Veterans.

OMB Control Number: 2900-NEW-ALS.

Type of Review: New collection.

Abstract: This study is designed to investigate the occurrence and to identify the causes of Amyotrophic Lateral Sclerosis (ALS) among Gulf War veterans. The study will further define

the epidemiology of the neurological disease among veterans under the age of 45, and will determine whether there is a higher than expected occurrence. ALS is a rare disease in patients under the age of 45, which is the group of the majority of veterans on active duty during the Gulf War. The study will also ascertain the probable (possible) etiology of ALS. The result of the data collection will have importance for both the VA in achieving its mission to provide for the health of veterans and for the larger society in understanding ALS. The study will indicate whether veterans deployed to the Persian Gulf during the Gulf War are at elevated risk of ALS.
