¹This dolphin mortality will be part of the IATTC Director's Reserve under the annual Dolphin Mortality Limits (DMLs) set for the fishery. It will replace any mortality that the chartered fishing vessel would have caused if it had been engaged in normal fishing operations.

Scientific research permits are generally categorically excluded from National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) (NEPA) requirements to prepare an EA or EIS; however, because of the impacts to the species involved and the intense public interest in this project, NMFS, in compliance with NEPA, has determined that an environmental assessment (EA) is warranted. The draft EA is a companion document to the scientific research permit application and is available for review simultaneously.

Written comments or requests for a public hearing on this application should be mailed to the Chief, Permits and Documentation Division, F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate.

Comments may also be submitted by facsimile at (301) 713-0376, provided the facsimile is confirmed by hard copy submitted by mail and postmarked no later than the closing date of the comment period. Please note that comments will not be accepted by e-mail or by other electronic media.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

BILLING CODE 3510-DR-F

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 01-2]

Quantum North America, Inc., and e4L, Inc.; Complaint

AGENCY: Consumer Product Safety Commission.

ACTION: Publication of a complaint under the Consumer Product Safety Act.

SUMMARY: Under provisions of its Rules of Practice for Adjudicative Proceeding (16 CFR Part 1025), the Consumer Product Safety Commission must publish in the **Federal Register** Complaints which it issues. Published below is a Complaint in the matter of Quantum North America, Inc., and e4L, Inc.

SUPPLEMENTARY INFORMATION: The text of the Complaint appears below.

Dated: May 31, 2001.

Todd A. Stevenson,
Deputy Secretary.

Complaint

Nature of Proceedings

1. This is an administrative proceeding pursuant to section 15 of the Consumer Product Safety Act ("CPSA"), 15 U.S.C. 2064; for public notification and remedial action to protect the public from substantial risks of injury presented by the Red Devil gas grill. This proceeding is governed by the Rules of Practice for Adjudicative Proceedings before the Consumer Product Safety Commission, 16 CFR part 1025.

Jurisdiction

2. This proceeding is instituted pursuant to the authority contained in sections 15(c), (d) and (f) of the CPSA, 15 U.S.C. 2064(c), (d) and (f).

Parties

3. Complaint counsel is the staff of the Legal Division of the Office of Compliance of the U.S. Consumer Product Safety Commission, an independent regulatory commission established by section 4 of the CPSA. 15 U.S.C. 2053.

4. Respondent Quantum North America, Inc. (hereinafter referred to as "Quantum") is a Delaware Corporation, with its principal place of business located at 15821 Ventura Boulevard, Encino, California.

5. Respondent, e4L, Inc. (hereinafter referred to as "e4L") is a Delaware Corporation, with its principal place of business located at 15821 Ventura Boulevard, Encino, California.

6. Quantum and e4L are "manufacturers" of consumer products as that term is defined in the CPSA, 15 U.S.C. 2052(a)(4). Quantum and e4L manufactured the Red Devil gas grill.

The Consumer Product

7. The Red Devil gas grill was produced and distributed specifically for sale to or use by consumers as an outdoor cooking appliance in or around a permanent or temporary residence. These gas grills are "consumer products" that were "distributed in commerce." 15 U.S.C. 2052(a)(1)(i) and (ii).

Defect

8. Paragraphs 1 through 7 are hereby realleged, and incorporated by reference as though fully set forth herein.

9. The Red Devil gas grill connects to a propane gas container. A plastic locking mechanism sits atop a collapsible three legged stand. A top threaded venturi tube, which contains four (4) symmetrical air intake openings, is placed through the underside of a plastic locking mechanism, and is vertically locked into place by flipping a handle. The lower end of the venturi tube is attached to a gas regulator. A burner pan is then placed on top of the venturi tube.

10. The Red Devil gas grill design leads consumers to light the grill at the air intake openingS on the venturi tube. If the grill is lit at this location, the consumer is igniting the combustible gas inside the tube. The grill will appear to function as intended, however, the venturi tube will reach temperatures up to 750°F.
