Giant Sequoia National Monument Management Plan EIS

AGENCY: USDA, Forest Service.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Department of Agriculture, Forest Service is preparing an environmental impact statement (EIS) to establish management direction for the land and resources within the Giant Sequoia National Monument (GSNM) created by Presidential Proclamation on April 15, 2000. The agency is to develop a management plan within three years of the signing of the Proclamation. The Forest Service, as the responsible agency, proposes to amend the Sequoia National Forest Land and Resource Management Plan (FLMP) to provide for the protection of the objects of interest identified in the Proclamation.

DATES: The public is asked to submit any issues (points of concern, debate, dispute, or disagreement) regarding potential effects of the proposed action by July 24, 2001. The draft EIS is expected to be available for public comment in February 2002 and the final EIS is expected to be published in September 2002.

ADDRESSES: Send written comments to: Jim Whitfield, EIS Team Leader, USDA Forest Service, Sequoia National Forest, 900 W. Grand Avenue, Porterville, CA 93257.

FOR FURTHER INFORMATION CONTACT: Jim Whitfield, EIS Team Leader, Sequoia National Forest, at the address listed above. The phone number is (559) 784-1500. Information regarding the monument and the planning process can also be found on the Giant Sequoia National Monument website located at www.r5.fs.fed.us/giant_sequoia. Public meetings will be held during the scoping period to allow the public to gather information prior to submitting comments. Information on the times, dates, locations, and agendas for these meetings will be provided in local newspapers, on the website, and by direct mailings.

SUPPLEMENTARY INFORMATION:

Background

On April 15, 2000, a Presidential Proclamation creating the Giant Sequoia National Monument was signed. The Proclamation designated 327,769 acres within the boundary of the Sequoia National Forest as a National Monument

to provide protection for a variety of objects of historic and scientific interest, including giant sequoia trees and their surrounding ecosystem. The President directed the Secretary of Agriculture to prepare a management plan within three years, and that the plan is to include a transportation plan. The plan will provide for and encourage continued public access and use consistent with the purposes of the Giant Sequoia National Monument. A range of alternatives will be analyzed, including the no-action alternative, which is the management direction provided by the current Forest Land and Resource Management Plan, as amended.

Purpose and Need for Action

The Presidential Proclamation identifies the need to take action regarding two critical problems facing giant sequoias and their ecosystems: (1) The heavy buildup of surface fuels and woody debris, leading to an increased hazard from wildfires, and (2) a lack of regeneration of young giant sequoias to ensure long-term sustainability of the species. The proclamation also clearly identifies opportunities for scientific research, interpretation, recreation, and the need for a transportation plan. We are committed to preparing a management plan that is responsive to these needs and opportunities and that provides proper care for the objects of interest as identified in the proclamation. These objects include:

1. The naturally occurring groves of giant sequoia,
2. The ecosystems within the GSNM that surround the groves and provide enriching recreational and social experiences, outstanding landscapes, and an array of rare and endemic species, such as the fisher, the great gray owl, the American marten, the northern goshawk, the peregrine falcon, the spotted owl, and the California condor,
3. The historical landscape in and around the Hume Lake Basin associated with the Euro-American use of the giant sequoia since the late 1800's, and
4. The limestone caverns and prehistoric archaeological sites that provide a paleontological record of the ecological changes that giant sequoias have undergone, as well as a prehistoric record of the relationship of the area to the native tribes.

Management Direction

Current management direction for the Sequoia National Forest and the GSNM includes the Presidential Proclamation and the Forest Land and Resource Management Plan as amended by the Sierra Nevada Forest Plan Amendment. The Sierra Nevada Forest Plan
