POLICY JUSTIFICATION

Hungary - Support for F-16A/B Aircraft

The Government of Hungary has requested a possible sale of four F-16A Block 10 operational capabilities upgrade aircraft for cannibalization and regeneration/upgrade of aircraft and engines, together with spare and repair parts, devices, support equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering and logistics personnel services and other related elements of logistics support in support of an F-16 lease. The estimated cost is \$370 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Hungary while enhancing weapon system standardization and interoperability with U.S. forces.

The Hungarian Air Force (HAF) currently operates MiG-29 aircraft. These former Warsaw Pact fighters are expensive to operate and maintain, lack essential NATO interoperability capabilities, and are nearing the end of their useful service lives. This proposed sale and the associated lease aircraft will enhance NATO interoperability while simultaneously providing operational capabilities as the Soviet-era aircraft in Hungarian inventory are eventually retired. This proposed sale would not impact the regional military balance of power. It will also allow the HAF to meet training requirements, as well as national air defense and NATO commitments, starting in early 2004.

The principal contractors will be Lockheed Martin Tactical Aircraft Systems of Fort Worth, Texas and Pratt and Whitney of East Hartford, Connecticut. One or more proposed offset agreements may be related to this proposed sale.

Implementation of this proposed sale will require the assignment of 11 U.S. Government and two contractor representatives for a period of up to three years to provide program support commencing with delivery of the aircraft to Hungary.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 01-20

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vi

(vi) Sensitivity of Technology:

- 1. The F-16A Block 10 operational capability upgrade aircraft and Pratt and Whitney F-100-PW-200 engine are unclassified. The aircraft does not contain state-of-the-art technology.
- 2. The F-100-PW-200 engines and the associated component parts used in F-16A aircraft are unclassified. However, several manufacturing processes, design practices, and metallurgical fabrication techniques used are advanced technology methods found only in the U.S. propulsion technology industry. The sale of the engines to Hungary will not include the transfer of sensitive technology since the proposed sale does not include manufacturing processes, design practices, or metallurgical fabrication techniques.
- 3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
- 4. A determination has been made that Hungary can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
