

SUMMARY: The Federal Maritime Commission ("Commission") published a Final and an Interim Rule in this proceeding as a new Part 514 of Title 46 CFR, covering tariffs and service contracts filed into the Commission's electronic system. The Ocean Shipping Reform Act of 1998 became effective May 1, 1999, and eliminated public tariff filing with the Commission. Accordingly, Part 514 of Title 46 CFR was deleted. Therefore, this proceeding can be, and hereby is, discontinued.

DATES: This proceeding is discontinued July 18, 2001.

FOR FURTHER INFORMATION CONTACT: Bruce A. Dombrowski, Executive Director, Federal Maritime Commission, 800 North Capitol Street, NW., Washington, DC 20573, (202) 523-5800.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking was published in the **Federal Register** on September 9, 1991 (56 FR 46044), proposing a new Part 514 of Title 46 CFR covering tariffs and service contracts filed into the Commission's Automated Tariff Filing and Information ("ATFI") System. After comments were considered by the Commission, a Final Rule was issued November 25, 1991 (56 FR 61164; December 2, 1991), and an Interim Rule was issued August 4, 1992 (57 FR 36248; August 12, 1992), implementing Part 514 and the ATFI System. These rules also incorporated all existing non-obsolete tariff regulations.

The Ocean Shipping Reform Act of 1998 became effective May 1, 1999, and eliminated public tariff filing with the Commission. ATFI ceased serving as the system for tariff and essential terms filing as of that date. The provisions of 46 CFR Part 514 were removed when the Commission adopted rules implementing the Ocean Shipping Reform Act of 1998 (64 FR 11186, March 8, 1999). Therefore, this proceeding is hereby discontinued.

By the Commission.

Bryant L. VanBrakle,
Secretary.

Atlantic Highly Migratory Species (HMS); 2001 Atlantic Bluefin Tuna Quota Specifications and General Category Effort Controls

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final initial quota specifications and General category effort controls.

SUMMARY: NMFS announces the final initial quota specifications for the Atlantic bluefin tuna (BFT) fishery to set BFT quota and General category effort controls for the 2001 fishing year. The final initial quota specifications and General category effort controls are necessary to implement the 1998 recommendation of the International Commission for the Conservation of Atlantic Tunas (ICCAT) as required by the Atlantic Tunas Convention Act (ATCA) and to achieve domestic management objectives under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

DATES: The final initial quota specifications and General category effort controls are effective July 13, 2001, through May 31, 2002.

ADDRESSES: Copies of supporting documents, including the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks (HMS FMP), are available from the Highly Migratory Species Management Division, NMFS,

Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930.

FOR FURTHER INFORMATION CONTACT: Brad McHale or Pat Scida at 978-281-9260.

SUPPLEMENTARY INFORMATION: Atlantic tunas are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and ATCA. ATCA authorizes the Secretary of Commerce (Secretary) to implement binding recommendations of ICCAT. The authority to issue regulations under the Magnuson-Stevens Act and ATCA has been delegated from the Secretary to the Assistant Administrator for Fisheries, NOAA (AA).

Background

On May 28, 1999, NMFS published in the **Federal Register** (64 FR 29090) final regulations, effective July 1, 1999, implementing the HMS FMP that was adopted and made available to the public in April 1999. The HMS FMP and its implementing regulations require that NMFS issue annual quota specifications and effort controls for the BFT fisheries. The final initial quota specifications allocate the total ICCAT-recommended quota (including the allocation of the unused portion of the dead discard allowance) among the several established fishing categories, carry over any unharvested quota in 2000 from a specific category to the same category for 2001, and are consistent with the BFT rebuilding program as set forth in the 1998 ICCAT recommendation and the HMS FMP. Further background information and rationale for these final initial quota specifications and General category effort controls were provided in the preamble to the proposed initial quota specifications and General category effort controls (66 FR 17520, April 2, 2001) and are not repeated here.

Changes From the Proposed Specifications

Based on consideration of comments received during the comment period, NMFS is reducing the number of restricted fishing days (RFDs) scheduled for the 2001 fishing year. The revised schedule is indicted in the section addressing effort controls. In addition, minor modifications have been made to the 2001 fishing year quotas based on revised landings for the 2000 fishing year.

Fishing Category Quotas

NMFS implements U.S. domestic quota allocations for the 2001 fishing year, beginning June 1, 2001, consistent with the HMS FMP and the 1,387-metric ton (mt) U.S. allocation. The percentage

quota shares established in the HMS FMP for fishing years beginning June 1, 1999 are as follows (tonnage in parentheses corresponds to 1,387 mt total quota): General category: 47.1 percent (653.3 mt); Harpoon category: 3.9 percent (54.1 mt); Purse Seine category: 18.6 percent (258.0 mt); Angling category: 19.7 percent (273.2 mt); Longline category: 8.1 percent (112.3 mt); Trap category: 0.1 percent (1.4 mt); and Reserve: 2.5 percent (34.7 mt).

Based on these percentages and on quota adjustments resulting from overharvests or underharvests in the 2000 fishing year, the adjusted quotas for the 2000 fishing year are as follows: 609.3 mt for the Angling category; 666.7 mt for the General category; 55.0 mt for the Harpoon category; 193.2 mt for the Longline category; 3.9 mt for the Trap category; 255.6 mt for the Purse Seine category; and 42.5 mt for the Reserve.

The Angling category quota is subdivided as follows: School BFT--247.8 mt, with 134.3 mt to the northern area (north of 38°47' N. lat.), 113.5 mt to the southern area (south of 38°47' N. lat.), and 20.6 mt held in reserve; large school/small medium BFT--330.0 mt, with 171.1 mt to the northern area and 158.9 mt to the southern area; and large medium/giant BFT--10.9 mt, with 4.8 mt to the northern area and 6.1 mt to the southern area. NMFS proposed a rule (65 FR 76601; December 7, 2000) that would adjust the location of the Angling category north-south dividing line to 39° 18' N. lat. and change the percentage quota allocations in the northern and southern areas. Should a final rule be issued to implement these changes during the 2001 fishing year, that final rule will also revise the 2001 Angling category subquotas contained in this document based on any changes made to the quota allocations for the northern and southern areas.

The Longline category is subdivided as follows: 24.9 mt to longline vessels landing BFT north of 34° N. latitude and 168.3 mt to longline vessels landing BFT south of 34° N. latitude.

General Category Effort Controls

For the 2001 fishing year, NMFS implements General category quota subdivisions as established in the HMS FMP, as follows: 60 percent for June-August, 30 percent for September, and 10 percent for October-December. Given the underharvest of the 2000 fishing year General category quota, these percentages are applied to the adjusted coastwide quota for the General category of 656.7 mt, with the remaining 10.0 mt being reserved for the New York Bight fishery. Therefore, coastwide, 394.0 mt
