As part of the conference agreement for FY 2000 appropriations, the Bureau of Justice Statistics was directed by the U.S. Congress "to implement a voluntary annual reporting system of all deaths occurring in law enforcement custody." BJS received OMB approval to conduct such an annual collection (OMB No. 1121-0249). In the time since submitting that collection for OMB approval, the President signed The Deaths in Custody Act of 2000 into law (Pub. L. 106-297). To comply with Public Law 106-297's new requirement for a quarterly collection of inmate death data from local jails, State prisons, juvenile facilities and police custody, BJS is now submitting for clearance the following series of forms: NPS-4, NPS-4A, NPS-5, NPS-5A, CJ-9, CJ-9A, CJ-10, and CJ-10A. This collection will supplement the annual data on prison inmate deaths which the Bureau of Justice Statistics already collects as part of the National Prisoners Statistics program and the National Corrections Reporting Program. The Bureau of Justice Statistics will use this new information to publish an annual report on deaths in custody. The report will be made available to the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, and others interested in criminal justice statistics and data.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-309]

Maine Yankee Atomic Power Company; Maine Yankee Atomic Power Station; Exemption

1.0 Background

Maine Yankee Atomic Power Company (MYAPC or the licensee) is the holder of Facility Operating License No. DPR-36, which authorizes possession of Maine Yankee Atomic Power Station (MYAPS). The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC or the Commission) now or hereafter in effect. The facility is a pressurized-water reactor (PWR) located on the licensee's site in Lincoln County, Maine.

On August 7, 1997, the licensee submitted written certifications to the Commission that it had decided to permanently cease operations at MYAPS and that all fuel had been permanently removed from the reactor. In accordance with 10 CFR 50.82(a)(2), "Termination of license," upon docketing of the certifications contained in the letter of August 7, 1997, the facility operating license no longer authorizes MYAPC to operate the reactor or to place fuel in the reactor vessel. The MYAPS spent nuclear fuel is currently being stored in the spent fuel pool, which is protected by a physical protection system meeting the requirements of 10 CFR 73.55, "Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage," with exemptions as previously issued by the NRC. To complete the plant site decommissioning process, the spent fuel will be removed from the spent fuel pool and transferred to an onsite independent spent fuel storage installation (ISFSI) for interim storage.

Pursuant to 10 CFR part 72, "Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste," an ISFSI may be licensed either under a general or a specific license. Under a general license, a licensee can construct and operate an ISFSI in accordance with the requirements of 10 CFR 72.212, "Conditions of general license issued under § 72.210[," "General license issued"]," without staff approval. Pursuant to 10 CFR 72.212(b)(5), a licensee must protect the spent fuel at the ISFSI against the design basis threat (DBT) of radiological sabotage in accordance with the same
