SUMMARY: The Occupational Safety and Health Administration (OSHA) solicits public comment concerning its request for Office of Management and Budget (OMB) approval of the information collection requirements associated with its regulations regarding State Plans for the development and enforcement of standards. Section 18 of the Occupational Safety and Health Act offers an opportunity to the States to assume responsibility for the development and enforcement of State standards through the mechanism of an OSHA-approved State Plan. Absent an approved plan States are precluded from enforcing occupational safety and health standards with respect to an issue that is addressed by OSHA. In order to obtain and maintain State Plan approval, a State must submit various documents to OSHA describing its program operation under 29 CFR Parts 1902, 1952, 1953, 1954, 1955, and 1956.

DATES: Submit written comments on or before November 5, 2001.

ADDRESSES: Submit written comments to the Docket Office, Docket No. ICR 1218-TWOW (2001), Occupational Safety and Health Administration, U.S. Department of Labor, Room N-2625, 200 Constitution Avenue, NW., Washington, DC 20210. SUPPLEMENTARY INFORMATION:**I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA 95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, has practical utility, reporting burden (time and cost) is minimized, collection instruments are understandable, and OSHA's estimate of the information collection burden is correct. Currently, OSHA is soliciting comments concerning the information collection requirements contained in the series of regulations establishing requirements for the initial approval, continuing approval, final approval, monitoring and evaluation of OSHA-approved State Plans:

- 29 CFR part 1902, State Plans for the Development and Enforcement of State Standards;
- 29 CFR part 1952, Approved State Plans for Enforcement of State Standards;
- 29 CFR part 1953, Changes to State Plans for the Development and Enforcement of State Standards;
- 29 CFR part 1954, Procedures for the Evaluation and Monitoring of Approved State Plans;
- 29 CFR part 1955, Procedures for Withdrawal of Approval of State Plans;
- 29 CFR part 1956, State Plans for the Development and Enforcement of State Standards Applicable to State and Local Government Employees in States without Approved Private Employee Plans

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed collection of information is necessary for the proper performance of OSHA's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and cost) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and

- Ways to minimize the burden on participating States, for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting OMB approval of the collection-of-information requirements associated with its State Plan regulations. Specifically, OSHA is requesting approval of a total burden-hour estimate of 9,874 hours affecting the 26 States that currently operate OSHA-approved State plans:

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to carry out a new information collection.

Abstract

National Science Foundation (NSF), Division of Human Resources (HRM), as part of its Workforce Planning efforts, is reengineering its business processes. Part of this reengineering effort is devoted to making the application and referral process for both internal and external applicants easier to use, more efficient and timely. Applicants will apply on-line using a web-based resume, which will prompt them to provide pertinent personal data necessary to apply for a position.

Proposed Project

Use of the Information

The information will be used by NSF to provide applicants with the ability to apply electronically for NSF positions and receive notification as to their qualifications, application dispensation and to request to be notified of future vacancies for which they may qualify.

In order to apply for vacancies, applicants will be required to submit certain data in order to receive consideration. Users only need access to the Internet for this system to work. This information will be used to determine which applicants are best qualified for a position, based on applicant responses to a series of job related "yes/no" or "multiple choice" questions. The resume portion requires applicants to provide the same information they would provide were they were submitting a paper OF-612. The obvious benefit being that the applicant may do so on-line, 24 hours a day/seven days a week and receive electronic notification about the status of their application or information on other vacancies for which they may qualify. Staff members of the Human Resource Division and the selecting official(s) for specific positions for which applicants apply are the only ones privy to the applicant data. The most significant data is not the applicant personal data such as address or phone number but rather their description of their work experience and their corresponding responses to those questions, which determine their overall rating, ranking, and referral to the selecting official.

Estimate of Burden

Public reporting burden for this collection of information is estimated to average less than 30 to 45 minutes to create the on line resume and
