III. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be amended to delete one or more uses. The Act further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, the Administrator may approve such a request.

IV. Loss of Active Ingredients

Unless the requests for cancellations are withdrawn, two pesticide active ingredients will no longer appear in any registered products. Those who are concerned about the potential loss of these active ingredients for pesticidal use are encouraged to work directly with the registrant(s) to explore the possibility of their withdrawing the request for cancellation. The active ingredients are listed in the following Table 3, with the EPA company and CAS number.

TABLE 3. — ACTIVE INGREDIENT DIS-
APPEARING AS A RESULT OF REG-
ISTRANTS' REQUEST TO CANCEL

CAS No.	Chemical Name	EPA Company No.
29457- 72-5	Lithium (Perfluorooctane sulfonate)	004822
58138- 08-2	Dichlorophenyl-2- (2,2,2- trichloroethy- l)oxirane	062719

V. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before March 25, 2002, unless indicated otherwise. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

VI. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1-year after the date the cancellation request was received by the Agency. This policy is in accordance with the Agency's statement of policy as prescribed in **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4). Exception to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

Agency (EPA).

ACTION: Notice of availability of draft
aquatic life criteria document for
atrazine.

SUMMARY: Section 304(a)(1) of the Clean
Water Act (CWA) requires the
Environmental Protection Agency (EPA)
to develop and publish, and from time
to time revise, criteria for water
accurately reflecting the latest scientific
knowledge. These criteria provide EPA's
recommendations to states and
authorized tribes as guidance in
establishing their water quality
standards as state or tribal law or
regulation. Today, EPA is notifying the
public about the availability of the draft
aquatic life criteria document for
atrazine.

EPA is notifying the public about the

for developing or revising criteria (63 FR
68354, December 10, 1998). As
indicated in the December 10, 1998 FR
notice, the Agency believes it is
important to provide the public with an
opportunity to submit scientific
information on draft criteria. EPA is
soliciting views from the public on
issues of science pertaining to the
information used in deriving the draft
criteria. EPA is also soliciting input
from the public on harmonizing risk
assessment methods used by the Office
of Water (OW) in its draft aquatic life
criteria document for atrazine and by
the Office of Pesticide Programs (OPP)
in its Preliminary Ecological Fate and
Effects Risk Assessment for Atrazine,
published elsewhere in this issue of the
Federal Register.
