

modifications may be made by these species as a result of demolition and removal activities, previous observations of the responses of pinnipeds to loud military overflights and regular human activities near the Mugu Lagoon haul-out sites have not shown injury, mortality, or extended disturbance.

Since the number of potential harassment takings of harbor seals, northern elephant seals, and California sea lions is estimated to be small, no take by injury and/or death is anticipated and will be avoided through the incorporation of the mitigation measures mentioned in this document and required under the IHA, and the activities will not have an unmitigable adverse impact on the availability of these pinniped stocks for subsistence uses, NMFS has determined that the requirements of section 101(a)(5)(D) of the MMPA have been met and the authorization can be issued.

Authorization

NMFS has issued an IHA to NBVC for demolition and building removal activities to take place in Mugu Lagoon, CA during a 1-year period provided the mitigation, monitoring, and reporting requirements described in this document and the IHA are undertaken.
