Needs and Uses: Section 21.960(e) requires winning bidders who are designated entities (small businesses) to file with its long-form application or statement of intention an exhibit which includes eligibility requirements as listed in Section 21.960(e). This exhibit should also list and summarize all agreements that affect designated entity status.

Section 21.960(f) requires all holders of BTA authorizations acquired by

auction that claim designated entity status to maintain, at their principal place of business or with their designated agent, an updated documentary file of ownership and revenue information necessary to establish their status.

All BTA authorization holders claiming eligibility under designated entity provisions are subject to audits under Section 21.960(g). Selection for an audit may be random, on information from any source, or on the basis of other factors. These audits may include inspection of the BTA holders' books, documents and other materials sufficient to confirm that such holders' representations are, and remain, accurate.

The exhibit submitted under Section 21.960(e) is necessary for the Commission to determine whether the applicant is qualified as a designated entity (small business) and therefore eligible for special measures including installment payments, reduced up-front payments and bidding credits. The records maintenance and audit provisions of Sections 21.960(f) and (g) are necessary to prevent abuse of the special measures offered to those MDS auction winners claiming designated entity status. These provisions requiring the retention of records should not prove overly burdensome, and they will help to ensure that only entities eligible under the auction rules will be able to take advantage of the designated entity measures.

Federal Communications Commission.

Recordkeeping; Third party Disclosure.

Needs and Uses: 47 CFR Parts 64 and 68 contain procedures for avoiding unwanted telephone solicitation to residences, and to regulate the use of automatic telephone dialing systems, artificial or prerecorded voice messages, and telephone facsimile machines. The rules prohibit prerecorded message calls to residences absent an emergency or the prior express consent of the called party. The rules further require that telephone solicitors maintain and use company-specific lists of residential subscribers who request not to receive further telephone calls (company-specific do-not-call lists), thereby affording consumers the choice of which solicitors, if any, they will hear from by telephone. Telephone solicitors also are required to have a written policy for maintaining do-not-call lists, and are responsible for informing and training their personnel in the existence and use of such lists. Moreover, the rules require that those making telephone solicitations identify themselves to called parties, and that basic identifying information also be included in telephone facsimile transmissions. The Commission believes that the requirements are the best means of preventing unwanted telephone solicitations.
