

final affirmative scope determination; in response, the Court issued a final and conclusive court decision with respect to the rough forgings scope litigation.

The Court determined that the Department should liquidate entries of rough forgings suspended since the publication of the A-588-604 antidumping duty order in 1987 without re-opening or re-reviewing any closed segment of the proceeding. The Department considers as open any segments of an antidumping proceeding which were ongoing at the time the scope issue was first raised before the Department with respect to forgings (i.e., as of Koyo's September 17, 1993 request for a scope inquiry). This decision thus requires liquidation under the TRBs order of all rough forgings entries suspended during any administrative review period open at the time the Department received the scope inquiry. Because the final results of the 1990-1992 reviews were not published until December 9, 1993 (see *Final Results of Antidumping Duty Administrative Reviews; Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From Japan and Tapered Roller Bearings, Four Inches or Less in Outside Diameter, and Components Thereof, From Japan*, 58 FR 64720), which was after the date on which Koyo filed its scope inquiry, the Department will liquidate all entries of rough forgings suspended during the 1990-1992 review periods under the TRBs antidumping duty order. Therefore, we will issue instructions to Customs to liquidate all suspended entries of TRBs and forgings subject to the A-588-604 order manufactured by Koyo during these periods pursuant to these amended final results.

Amendment To Final Determinations

Pursuant to 19 U.S.C. 1516a(e), we are now amending the final results of administrative reviews of the antidumping duty order on TRBs from Japan (A-588-604) for Koyo. The weighted-average margins are as follows:

Period	Final results margin (percent)
3/27/87-9/30/88	36.29
10/1/88-9/30/89	24.88
10/1/89-9/30/90	30.08
10/1/90-9/30/91	17.36
10/1/91-9/30/92	24.87

Appraisal Methodology

Accordingly, the Department will determine and Customs will assess appropriate antidumping duties on

entries of the subject merchandise manufactured/entered by Koyo covered by the reviews of the periods listed above. The Department will instruct Customs to liquidate TRBs manufactured by Koyo and entered into United States during the first three administrative review periods (1987-1988, 1988-1989, and 1989-1990) using the above-referenced weighted-average margins. As a result of the Court's decision with regard to the rough forgings scope litigation, the Department will instruct Customs to liquidate all suspended entries of TRBs and rough forgings manufactured by Koyo and entered into the United States between October 1, 1990 and September 30, 1992 using importer-specific assessment rates. The Department will issue appraisal instructions directly to Customs.

Dated: October 15, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Notice of Initiation of Joint Review of Management Plans/Regulations for the Cordell Bank, Gulf of the Farallones, and Monterey Bay National Marine Sanctuaries; Intent To Prepare Draft Environmental Impact Statements and Management Plans; Scoping Meetings

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration, Department of Commerce (DOC).

ACTION: Initiation of joint review of management plans/regulations; intent to prepare environmental impact statements; scoping meetings.

SUMMARY: Cordell Bank National Marine Sanctuary (CBNMS) was designated in 1989 and encompasses 526 square miles of open ocean off Point Reyes, California. Cordell Bank is a submerged island that reaches within 120 feet of the ocean surface. The upwelling of nutrient rich ocean waters and the bank's topography create one of the most biologically productive areas in North America. The present management plan was completed in 1989.

Gulf of the Farallones National Marine Sanctuary (GFNMS) is located

along the California coast west of the San Francisco Bay area. It was designated in 1981 and encompasses 1,255 square miles. The Gulf of the Farallones is rich in marine resources, including spawning grounds and nursery areas for commercially valuable species, at least 36 species of marine mammals, and 15 species of breeding seabirds. The present management plan was completed in 1987.

Monterey Bay National Marine Sanctuary (MBNMS) stretches along 276 miles of the central California coast and encompasses 5,328 square miles of coastal and ocean waters. It was designated in 1992 and contains many diverse biological communities, including sandy bottom and rocky outcrop habitats, the nation's largest expanse of kelp forests, one of the deepest underwater canyons in North America, and a vast open ocean habitat. The present management plan was completed in 1992.

The National Marine Sanctuary Program (NMSP) is jointly reviewing the management plans for all three sanctuaries. These sanctuaries are located adjacent to one another, managed by the same program, and share many of the same resources and issues. In addition, all three sites share many overlapping interest and user groups. It is also more cost-effective for the program to review the three sites jointly rather than conducting three independent reviews.

In accordance with section 304(e) of the National Marine Sanctuaries Act, as amended, (NMSA) (16 U.S.C. 1431 *et seq.*), the Marine Sanctuaries Division (MSD) of the National Oceanic and Atmospheric Administration (NOAA) is initiating a review of the management plans, to evaluate substantive progress toward implementing the goals for the Sanctuaries, and to make revisions to the plans and regulations as necessary to fulfill the purposes and policies of the NMSA.

The proposed revised management plans will likely involve changes to existing policies and regulations of the Sanctuary, to address contemporary issues and challenges, and to better protect and manage the Sanctuaries resources and qualities. The review process is composed of four major stages: information collection and characterization; preparation and release of a draft management plan/environmental impact statement, and any proposed amendments to the regulations; public review and comment; preparation and release of a final management plan/environmental impact statement, and any final amendments to the regulations. NOAA

anticipates completion of the revised management plans and concomitant documents will require approximately eighteen to twenty-four months.

NOAA will conduct public scoping meetings to gather information and other comments from individuals, organizations, and government agencies on the scope, types and significance of issues related to the sanctuaries management plans and regulations. The scoping meetings are scheduled starting on November 28, and are detailed below.

DATES: Written comments should be received on or before January 31, 2002.
