SUPPLEMENTARY INFORMATION:

Request for Emergency Clearance for Data Collection in Support of A Cross-Site Evaluation of National Science Foundation's Directorate for Education and Human Resources The Cross Site Analysis of The Integrative Graduate Education and Research Traineeship (IGERT) Program

OMB Approval Number: OMB 3145-(new).

Expiration Date: Not applicable.

Abstract: The National Science Foundation requests a 180-day emergency clearance for the Cross Site Analysis of the Integrative Graduate Education and Research Traineeship (IGERT) Program. This site-based interview component is a part of a mixed method impact study and complements and verifies data from the previously cleared IGERT Distance Monitoring System. NSF has determined that it cannot reasonably comply with the normal clearance procedures both because of the time-sensitive nature of this portion of the IGERT evaluation, and because of the burden to the 1998 cohort projects, and to visiting peer scientists, who have already agreed to participate in site visits. Without emergency clearance, it will not be possible to complete the 15 site visits in this cohort of projects (currently in their third year) during this academic year. For data to be useful to the IGERT Program Office, visits must be made during this pivotal third year of the five-year funding cycle, which allows time both for sufficient program development, and for NSF-requested project modifications, if necessary. The projects involve multiple departments/schools within universities as well as external partners and scheduling visits is difficult. Many sites have scheduled visits on the expectation of clearance and would be forced to reschedule
