AGENCY: Army Corps of Engineers, DoD. **ACTION:** Notice of availability.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 (as amended), the U.S. Army Corps of Engineers (USACE), Little Rock District, has prepared a Draft Environmental Impact Statement (DEIS) for the proposed implementation of a revised Shoreline Management Plan (SMP) at Greers Ferry Lake, Heber Springs, Arkansas. This DEIS is being made available for a 60-day public comment period.

SUPPLEMENTARY INFORMATION:

Setting

The Greers Ferry Lake Project area is in the foothills of the Ozard Mountains in north-central Arkansas. The project area is approximately 65 miles from Little Rock, Arkansas, and 130 miles from Memphis, Tennessee. The lake lies within Cleburne and Van Buren Counties. Large portions of Stone and Searcy Counties and small portions of Pope and Conway counties also fall within the lake's watershed. The area around the lake is principally rural in character. More than 80 percent of the land in the watershed is forested, and 12 percent is agricultural. Greers Ferry Lake was constructed between March 1959 and July 1964. The project area includes 45,548 acres (slightly more than 71 square miles). Within the project area, the government owns flowage easements over 4,634 acres. The lake's waters cover 31,500 acres when measured at the "conservation pool" level of 461 feet above mean sea level. When waters must be held to prevent flooding of areas below the dam, the

surface of the lake may rise to 487 feet above mean sea level. When this happens, the lake's surface area increases to 40,500 acres, and adjacent lands subject to the flowage easements become inundated.

Background

The Department of the Army, Corps of Engineers, published a Notice of Intent in the Federal Register (65 FR 51299-51300, Aug. 23, 2000) stating its intent to prepare an EIS for a proposed revision of the Greers Ferry Lake Shoreline Management Plan (SMP). The SMP is a comprehensive plan for managing the shoreline at Greers Ferry Lake. The SMP is required by Federal regulations found at Title 36 of the Code of Federal Regulations (CFR), § 327.30, which contain a set of requirements for a periodic SMP review. The current version of the Greers Ferry Lake SMP became effective on November 21, 1994. The proposed SMP would revise various elements of the 1994 SMP. These elements include zoning of limited development area, vegetation modification, provisions for grandfathered docks, and restrictions on boats with sleeping quarters and/or marine sanitation devices. As part of its decision-making process, the Corps is preparing an Environmental Impact Statement (EIS) to determine the potential environmental effects of implementing a revised SMP.

Proposed Action and Alternatives

The Corps policy at Greers Ferry Lake is to protect and manage project shorelines in a manner that promotes safe and healthful use by the public while maintaining environmental safeguards to ensure a quality resource. Consistent with Corps policy and the purpose and need for the proposed action, the Little Rock District and the Greers Ferry Project Office propose to implement a revision of the Greers Ferry Lake SMP following review of pubic comments and appropriate environmental impact analysis. The SMP would adhere to Corps policy and Title 36 of the CFR, cited previously. The DEIS examines four action alternatives for revising the SMP and a no action alternative. These alternatives are described in the following paragraphs.

• Alternative 1 (No Action Alternative). Under the No Action Alternative, the Little Rock District would make no changes to the existing 1994 Greers Ferry Lake SMP. No new management elements would be adopted, and no existing management elements would be modified. Rezoning applications received during the current
