DEPARTMENT OF HEALTH AND HUMAN SERVICES**Substance Abuse and Mental Health Services Administration****Agency Information Collection Activities: Submission for OMB Review; Comment Request**

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a list of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (301) 443-7978.

Core Measures for the Center for Substance Abuse Prevention—New—
The mission of SAMHSA's Center for Substance Abuse Prevention (CSAP) is to decrease substance use and abuse and related problems among the American public by bridging the gap between research and practice. CSAP accomplishes this through field-testing scientifically defensible programs; disseminating comprehensive, culturally appropriate prevention strategies, policies, and systems; and capacity building for states and community-based providers. Data will be collected from CSAP grants and contracts where participant outcomes are assessed pre- and post-intervention. The analysis of these data will help determine whether progress is being made in achieving CSAP's mission.

The primary purpose of the proposed data activity is to promote the use among CSAP grantees and contractors of measures recommended by CSAP as a result of extensive examination and recommendations, using consistent criteria, by panels of experts. The use of consistent measurement for specified constructs across CSAP funded projects will improve CSAP's ability to respond to the Government Performance and Results Act (GPRA) and address goals and objectives outlined in the Office of National Drug Control Policy's Performance Measures of Effectiveness.

It is important to emphasize that CSAP is not requiring the use of these measures if (1) The program does not already plan to target change in the specified construct(s) and/or (2) the measure is not valid for the program's targeted population. The Core Measures are only to be used if appropriate to the program's target population and consistent with the outcome(s) selected by the program. Consequently, no additional burden on the target population is estimated because the program is not being asked to collect

data above and beyond what would already have been planned. The annual burden estimated is that for the grantees

to extract the necessary data from their files and provide it to CSAP's data coordinating center. The table below

summarizes the maximum estimated time, *i.e.*, if all programs used all of the Core Measures—which is unlikely.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of an Environmental Assessment and Receipt of an Application for an Incidental Take Permit for a City Government Facility, Deltona, Volusia County, FL

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The City of Deltona (Applicant), seeks an incidental take permit (ITP) from the Fish and Wildlife Service (Service), pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 (Act), as amended. The ITP would authorize the take of two families of the threatened Florida scrub-jay,

Aphelocoma coerulescens and the threatened eastern indigo snake, *Drymarchon corais couperi*, in Volusia County, Florida, for a period of twenty (20) years. The proposed taking is incidental to land clearing activities, road widening and development on a 10-acre project site (Project). The Project contains about 0.2 acre of occupied Florida scrub-jay habitat, and the potential exists for the entire Project to provide habitat to the eastern indigo snake. A description of the mitigation and minimization measures outlined in the Applicant's Habitat Conservation Plan (HCP) to address the effects of the Project to the protected species is described further in the **SUPPLEMENTARY INFORMATION** section below.

The Service also announces the availability of an environmental
