BILLING CODE 4310-70-P

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Intent To Repatriate Native American Cultural Items in the Possession of the U.S. Department of the Interior, National Park Service, Capitol Reef National Park, Torrey, UT

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act, 43 CFR 10.10 (a)(3), of the intent to repatriate three cultural items in the possession of the U.S. Department of the Interior, National Park Service, Capitol Reef National Park, Torrey, UT.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 43 CFR 10.2 (c). The determinations within this notice are the sole responsibilities of the National Park Service unit that has control or possession of these Native American cultural items. The Assistant Director, Cultural Resources Stewardship and Partnerships is not responsible for the determinations within this notice.

In 1926, Ephraim P. Pectol discovered three buffalo-hide shields cached in a rock crevice on public lands southeast of Torrey, UT. Though he had not obtained the permit required to remove an object of antiquity from Federal lands, Mr. Pectol removed the shields from the rock crevice and took them to his home and place of business. In 1932, a Federal agent seized the shields and returned them to Federal control, though they remained in the possession of Mr. Pectol. Capitol Reef National Monument acquired the shields in 1953. The three shields have been designated as CARE-11, CARE-12, and CARE-191.

CARE-11 is a roughly circular piece of buffalo hide with a diameter of approximately 79 centimeters. The original shape and dimensions of the shield have been altered by minor damage along its perimeter probably caused by rodent gnawing and/or exposure to weathering processes while in the cache. The face of the shield is concave and is decorated with a wing-

shaped design of red pigment and a fan-shaped section of radiating green stripes. The convex side of the shield exhibits some red pigment stain and some incised triangular patterns. Three buckskin ties hang from the face as fringe and, on the back of the shield, serve to fasten an arm strap. A looping piece of buckskin is tied to 2 holes about 20 centimeters apart on the perimeter of the shield. A series of 12 holes in a straight line angles outward from the center of the shield to the perimeter. A tear in the rawhide, about 1.9 centimeter long, has been repaired with a hide lace.

CARE-12 is a roughly circular piece of buffalo hide measuring approximately 88 centimeters by 70 centimeters. The original shape and dimensions of the shield have been altered by damage along its perimeter probably caused by rodent gnawing and/or exposure to weathering processes while in the cache. It is believed to have been circular when originally constructed. The face of the shield is convex and is decorated with parallel rows of unpainted, stenciled dots on a painted field. Approximately two-thirds of the painted field is black and one-third is covered with a rust-colored pigment. Five buckskin ties hang from the face as a fringe and, on the back of the shield, some serve to fasten an arm sling. The arm sling has a padded piece of hide. The shield exhibits a cut mark along one edge, probably caused when a radiocarbon dating sample was removed by researchers in the 1960s.

CARE-191 is a roughly circular piece of buffalo hide measuring approximately 95 centimeters by 74 centimeters. The original shape and dimensions of the shield have been altered by damage along its perimeter probably caused by rodent gnawing and/or exposure to weathering processes while in the cache. It is believed to have been circular when originally constructed. The face of the shield is convex and is decorated in four painted quadrants. One quadrant is painted with a rust-colored pigment. One quadrant is painted red. One quadrant is painted black. One quadrant is painted with green bands. Three buckskin ties hang from the face as fringe and hold a buckskin arm strap on the back.

An assessment of the three shields was made by National Park Service professional staff, specially contracted independent scholars, and representatives of the Navajo Nation, Arizona, New Mexico and Utah; Hopi Tribe of Arizona; Jicarilla Apache Tribe of the Jicarilla Apache Indian Reservation, New Mexico; and Kaibab
